

Leadership and Management: A Personal Perspective Paper Example Essay

Introduction

Leadership defines the action of heading persons in an organization with the objective of attaining a defined objective. Organizational leaders achieve their objectives by influencing the behaviors of employees in different ways. Moreover, a leader sets a clear vision in an organization, motivates the staff, guides the personnel through their work procedures and also boosts the workers' morale. Other examples of leadership roles include solving conflicts, setting organization's vision, recruiting and training new employees. Today, leadership is considered to be an important role in promoting employees' performance and productivity. As such, good leaders set clear visions for their staff and then encourages them to embrace the desired future of the organization. Management, on the other hand, means the deployment as well as manipulation of human, financial, technological and natural resources in an organization. Proper management is imperative for all organizations because it helps in arranging the factors of production, gathers and organizes essential resources and then integrates the resources in an effective way to achieve the organizational goals. Also, I possess good conflict solving capabilities, which is efficient in solving conflicts between different workers under my leadership in an organization. Solving conflicts on time is imperative in ensuring that the operations of organizations run seamlessly without unnecessary interruptions (Clove & Goldsmith, 2011). Ultimately, the development of a clear vision is among the most imperative leadership roles in an organization. The role aligns with my strength to develop a well-defined vision that is easy to execute in achieve the desired goals.

Identification of the Desired Area of Growth

Motivation is the area of growth that I would like to promote to be more efficient when taking a leadership position in an organization. Additionally, this is because employees' motivation is an imperative aspect that promotes the performance of a department or an entire organization (Chaffari, Burgoyne, & Nazri, 2017). Systems Research Theories and Methods *A Pac-Man Perspective on Organisational Change* Petter Ogland, 2017-12

Living theory is a way of making use of personal accounts of experienced practice. As the Pac Man perspective on organisational change helps the change agent articulate the personal values he is committed to and how these values may be resisted in practice, living theory is useful for developing knowledge that has a practical impact on self improvement and social change. But it is also a type of theory that is difficult to publish in academic outlets. As a consequence of this, publishing Pac Man living theory research becomes a Pac Man game in itself, with the journal editors as one of the four adversary gatekeepers. But it is a rewarding game for those who want to contribute both theoretically and practically on how to make the world a better place.
