components of the book include for each recipe a list of ingredients with household measures the preparation and cooking method cooking time nutrient profile per 100g of recipe servings and a photograph of the final dish In addition individual recipes have been grouped into broader categories for ease of reference Recipes that are common among urban dwellers have also been captured Recipes that apply to infants particularly have been indicated in the recipe introductions Of note about infant recipes is that the information received during focus group discussions revealed that most of the recipes consumed by the entire family are also eaten by infants above 6 months and children A full nutrient profile nutrient calculations yield factors and retention values are provided per recipe Of note the recipes in this book were developed to serve a minimum of four people There is still room for continued review and inclusion of more recipes that will provide a wide representation of the Kenyan Cuisine give correct information on the population diet holistically tackle malnutrition inform current programming and influence policies and consequently address chronic and acute malnutrition in the country in a more sustainable way
