Although the Creeks constitute a sovereign nation today the concept of the nation meant little to their ancestors in the Native South Rather as Steven Peach contends in *Rivers of Power* the Creeks of present day Georgia and Alabama conceptualized

rivers as the basis of power leadership and governance in early America An original work of Indigenous ethnohistory Peach's book explores the implications of this river oriented approach to power in which rivers were a metaphor for the subregional provinces that defined the political textures of Creek country The provinces nurtured leaders who worked to mitigate dangers across the Native South including intertribal war trade dependence settler intrusion and land erosion Rivers of Power describes a system in which these headmen forged remarkably malleable coalitions within and across provinces to safeguard Creek country from harm but were in turn directed approved and contested by local townspeople and kin groups Taking a unique bottom up approach to the study of Native Americans Peach reveals how local actors guided and thwarted Indigenous headmen far more frequently and creatively than has been assumed He also shows that although the Creeks traced descent through the maternal line some became more comfortable with bilateral kinship giving weight to both the paternal and maternal lineages Fathers and sons thus played greater roles in Creek governance than Indigenous scholarship has acknowledged Weaving a new narrative of the Creeks and outlining the contours of their riverine mode of governance this work unpacks the fraught dimensions of political power in the Native South and indeed Native North America in the eighteenth and early nineteenth centuries By privileging Indigenous thought and intertribal history it also advances the larger project of Native American history

**Co-preaching** Frida Mannerfelt, 2023-05-04 The purposes of this article based thesis are to explore and understand preaching as a practice in general and the practice of preaching in digital culture and spaces in particular Informed by the practice theory of Theodore Schatzki it presents the results of a cross case analysis of four different case studies of the practice of preaching in digital culture and spaces in Swedish protestant churches Based on the analysis Frida Mannerfelt argues that the deep relationality of the practice of preaching involves not just humans and texts but also material arrangements and that this feature often is amplified in digital culture and spaces While there were examples of a decrease overall there was an increase in interaction negotiation and interdependency In light of this Manner felt contends that the practice of preaching in digital culture and spaces is characterized by co preaching Moreover Mannerfelt argues that some of the implications of co preaching are the enabling and encouragement of dialogue imagination and the priestly function of the priesthood of all believers but also an increased vulnerability for the co preachers involved
