

Leader Development and Personal Action Plan

✓ Exclusively available on IvyPanda

Creating the personal action plan, it is necessary to take into consideration all strengths and weaknesses and to turn the theoretical advice into practice in order to develop their own leadership and action plan. Thereby, an understanding of the individual characteristics will help to establish the most appropriate strategy. According to Daft and Lengel (2008), it is highly essential to develop oneself in order to get more professional success. Self-organizing is the most critical part of the leadership process and movement from fission to fusion.

Providing the personal action plan, I concentrate on such capacities as the self-inquiry, facilitation, welcoming, and readiness for changes and cooperation with partners. Those aspects are the most important peculiarities of the personal action plan. It is essential to develop a personal leadership style that will help to be unique and recognizable. The benefits of this issue are clearly seen. For partners, it is more preferable to choose the company or leader which is able to provide a unique strategy and ideas.

Moreover, I take into consideration the statement that the leader has to control people for the sake of a goal. Therefore, the leader should be the first person who sees the new perspectives and react to the last tendencies and demands of a particular business area. As a leader, I will use my technical, conceptual, and human skills, composing my action plan. A clear understanding of my strengths and weaknesses will help me to provide the most effective and appropriate strategy. My action plan should provide adequate consideration of managing performance, indicating critical points, and soft skills.

Taking into account three levels of collaborative management (Voets, J., De Rynck F., and Van Dooren, 2006, p.1), I will compare my action plan with the concrete situation. There can be an individual level that means those people who manage collaboratively, the organizational level that takes into consideration the organizations that provide the collaborative management, and the third collective level that implies the collaboration itself and its functions in the direction of the particular company.

Medical Education: Theory and Practice E-Book Tim Dornan, Karen V. Mann, Albert J J A Scherpbier, John A. Spencer, 2011-12-02 *Medical Education: Theory and Practice* is a new text linking the theory and the practice for graduate students and educators who want to go beyond the basics. The scholarship of medical education is above all a practice but one that has a strong theoretical foundation. Neither theory nor practice stand still and both are grounded in research. The novelty of this book lies in its interweaving of practice, theory, innovation and research. The book starts with a theorised contemporary overview of the field. Next it explores the theoretical foundations of medical education in depth. The remainder of the book reviews a whole range of educational contexts, processes and outcomes. This work has been edited by a distinguished international team of medical educationalists and written by equally accomplished authors from across the globe representing a spectrum of disciplines. This will be an invaluable text for all Masters Students in health professions education as well as PhD students and education researchers wanting a background to the discipline. Educators and medical students will also find it a very useful resource. Written by key figures in medical educational research combined with a strong editorial influence from the international editorial team. The text has a strong evidence based approach that is fully cognisant of research methodology issues. The book provides a scholarly explanation on the topic rather than aiming to say the last word. Written throughout in a clear and comprehensible style. The content is extensively referenced with additional suggestions for further reading.

Creating Wicked Students Paul Hanstedt,2023-07-03 In Creating Wicked Students Paul Hanstedt argues that courses can and should be designed to present students with what are

known as wicked problems because the skills of dealing with such knotty problems are what will best prepare them for life after college As the author puts it this book begins with the assumption that what we all want for our students is that they be capable of changing the world When a student leaves college we want them to enter the world not as drones participating mindlessly in activities to which they've been appointed but as thinking deliberative beings who add something to society There's a lot of talk in education these days about wicked problems problems that defy traditional expectations or knowledge problems that evolve over time Zika ISIS political discourse in the era of social media To prepare students for such wicked problems they need to have wicked competencies the ability to respond easily and on the fly to complex challenges Unfortunately a traditional education that focuses on content and skills often fails to achieve this sense of wickedness Students memorize for the test prepare for the paper practice the various algorithms over and over again but when the parameters or dynamics of the test or the paper or the equation change students are often at a loss for how to adjust This is a course design book centered on the idea that the goal in the college classroom in all classrooms all the time is to develop students who are not just loaded with content but capable of using that content in thoughtful deliberate ways to make the world a better place Achieving this goal requires a top to bottom reconsideration of courses including student learning goals text selection and course structure day to day pedagogies and assignment and project design Creating Wicked Students takes readers through each step of the process providing multiple examples at each stage while always encouraging instructors to consider concepts and exercises in light of their own courses and students
