License to Spill Rachel Plotnick, 2025-04-29. How everyday wetness from finger smudges, sweat, and spilled drinks to showering and swimming collides with consumers' media devices designed to stay dry. License to Spill investigates the everyday moments, activities, and spaces where media technologies and liquids collide from disastrous spilled drinks that corrode laptops and drops in the toilet that drown smartphones to the greasy finger smudges and sweat droplets that sully screens and glitch smartwatches. Putting historical and present-day case studies in conversation, Rachel Plotnick considers how people's experiences with media devices inevitably encounter wetness and yet consumers, not the companies who make the devices, take the blame when leaks, spillages, and overflows occur. Along with thinking about preventive measures and device caretaking, License to Spill examines how water-resistant and waterproofed technologies, through their design and marketing, imagine the brawniest and hardest of users meant to punish and abuse their tough devices, granting them unfettered permission to get wet. Examining a long history of torture testing and hyperbolic claims of imperviousness, the book demonstrates how protective designs relate to broader cultural ideas about media use as sporty, luxurious, excessive, or messy. This context is especially relevant given that the market for water-resistant bags, cases, coatings, and seals has flourished over the past decade with new rhetoric about wetness as natural and digital technologies as ever present. The book pushes us to attend to both the ideals and problems that arise when designing resilient devices, ranging from the right to repair movement and lawsuits over ingress protection IP ratings to obsolescence culture and work-from-home activities in the wake of the COVID-19 pandemic.

Introduction to Criminal Justice Information Systems Ralph Ioimo, 2018-09-03. The proliferation of information systems throughout the criminal justice system has prompted many universities supporting criminal justice programs to add criminal justice information systems technology to their curriculums. Several universities have gone so far as to hire professors with specializations in information technology and to offer criminal justice information systems as an area of concentration. Introduction to Criminal Justice Information Systems gives an overview of the various software systems and technologies currently used in the criminal justice environment. The book covers a variety of topics critical to each member of the criminal justice system: police, prosecutor, courts, and corrections. It details the current systems in use, how they are used, and how separate systems interact with others. It also suggests how the current technology and the processes built upon it will evolve. While designed as a textbook to meet the needs of an introductory criminal justice information technology course, Introduction to Criminal Justice Information Systems is also a

flexible resource useful to professionals in relevant areas of the criminal justice system With rapidly increasing development and use of technology in modern law enforcement this book provides a much needed reference for those who are responsible for its implementation as well as an essential introduction to those who will become responsible for it An instructor s manual is available as an electronic download upon request *PC Magazine* ,2006 PC Mag ,2006-03-21 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology PC Mag ,2006-03-21 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **The Army Communicator** ,2003 **HWM** ,2006-01 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews MotorBoating ,2003-01 **Technology for Communication and Cognitive Treatment** Joan L.
