Performance Task

SC 2015 Standards:

G.GCI.2: Identify and describe relationships among inscribed angles, radii, and chords; among inscribed angles, central angles, and circumscribed angles; and between radii and tangents to circles. Use those relationships to solve mathematical and real-world problems.

G.GGPE.1: Understand that the standard equation of a circle is derived from the definition of a circle and the distance formula.

ACT Standards:

ACT D. 3. b. Determine the measure of central and inscribed angles and their intercepted arcs

ACT D. 3. c. Find segment lengths, angle measures, and intercepted arc measures formed by chords, secants, and tangents intersecting inside and outside circles

ACT G. 1. d. Write equations for circles in standard form and solve problems using equations and graphs

Objective:

Apply the properties of central angles, inscribed angles, and arcs of circles to solve problems

Apply the properties of lines that intersect circles (including two secants, two tangents, and a secant and a tangent) to solve problems

Find the center and radius given the equation of a circle

Write the equation of a circle given the radius and center or center and point on the circle

R. Gonzalez,2016-06-10 The performance of most tasks with one hand typically the right is a uniquely human characteristic Not only do people prefer to use one hand rather than the other but also they usually perform tasks faster and more accurately with this hand The study of manual asymmetries and what such performance differences between the two hands reveal about brain organization and motor function has been a topic of considerable research over the last several decades The aim of this Research Topic is to review and further explore the origins of manual asymmetries and their relationship to handedness unimanual and bimanual motor performance and brain function The articles included here involve original research conducted in humans or non human models species as well as theoretical perspectives review articles and meta analyses *Teaching Civic Literacy Projects* Shira Eve Epstein,2014 This practical resource shows teachers how to enact robust forms of civic education in today s schools Both instructive and thought provoking it will inspire teachers to craft curricula addressing a wide range of genuine civic problems such as those related to racial discrimination environmental damage and community health Dividing civic

literacy projects into three key phases problem identification problem exploration and action the author provides concrete examples from upper elementary middle and high school classrooms to illustrate and analyze how each phase can unfold The projects ultimately provide opportunities for youth to participate in civic life while they develop essential literacy skills associated with reading writing and speaking The final chapter outlines a curriculum design process that will result in coherent and meaningful civic literacy projects driven by clear goals It includes practical tools such as a sample unit timeline an assessment chart and student worksheets that can be modified for immediate use Shira's work offers us a reflection of democratic practice in the classroom through the teaching of critical reading persuasive writing and deliberation In *Teaching Civic Literacy Projects* Shira invites us all to contemplate the depth of the democratic project and the possibility that schools can help uphold our democratic ideals From the Foreword by Celia Oyler professor Teachers College Columbia University This book is a gem Shira Epstein has provided invaluable assistance for teachers interested in engaging their students in the political and civic spheres in ways that build crucial literacy skills The combination of a powerful framework and rich and detailed case studies provides readers with a clear vision and helpful specific guidance for creating robust civic learning experiences for young people Diana Hess senior vice president Spencer Foundation and professor University of Wisconsin Madison Excellent civic education means encouraging young people to identify and define problems and take action That is challenging in our era of political polarization and narrow definitions of education Shira Eve Epstein provides the best practical guide for teachers who want their students to confront social problems Peter Levine Lincoln Filene Professor of Citizenship Public Affairs Tufts University *Visual Attention and Cortical Circuits* Jochen Braun, Christof Koch, Joel L. The Psychology of Closed Self-Paced Motor Tasks in Sports Ronnie Lidor,Gal Ziv,2022-06-01 In practice settings competitions and games athletes are often required to perform an arsenal of motor tasks in dynamic and challenged sporting environments where they have to respond without having enough time to prepare themselves for the act However in many sport activities athletes also perform closed self paced motor tasks tasks that take place in a relatively stable and predictable environment where there is adequate time to prepare for their execution Among these tasks are free throw shots in basketball putting in golf serving in tennis and bowling In these tasks performers are able to plan their actions in advance They can activate a plan a strategy a protocol or a procedure what we term a ritual behavior Effective rituals are usually

achieved with a high degree of consistency That is either deliberately or subconsciously they become an integral part of the act itself The Psychology of Closed Self Paced Motor Tasks in Sports explores those plans procedures protocols strategies and techniques that aim at facilitating the performance and learning of closed self paced motor tasks Included in the instructional psychological routines discussed in this book are pre performance routines focusing attention motor imagery enhanced expectancies autonomy support gaze strategies self talk and periodization The routines discussed in the book are evidence based Based on updated reviews of laboratory and field inquiries on the discussed instructional psychological routines practical implications are given for those professionals who teach closed self paced motor tasks including coaches instructors and sport psychology consultants [Quality Circles](#) Russell F.
