Hobbs,2014-02-19 This study of the Egyptian mountain

widely believed to be Mount Sinai examines its geographical features sacred sites and the effects of rising tourism Amid the high mountains of Egypt's southern Sinai Peninsula stands Jebel Musa Mount Moses which many Christians and Muslims revere as Mount Sinai In this fascinating study Joseph Hobbs draws on geography and archaeology Biblical and Quranic accounts and a wide array of personal experiences from Christian monks to Bedouin shepherds medieval Europeans and casual tourists to explore why this mountain came to be considered a sacred place He also shows how that very perception now threatens its fragile ecology and inspiring solitude After discussing the physical and geographic characteristics of Jebel Musa that suggest it as the most probable Mount Sinai Hobbs fully describes all Christian and Muslim sacred sites around the mountain He also views Mount Sinai from the perspectives of the Jabaliya Bedouins and the monks of the St Katherine Monastery both of whom have inhabited in the region for centuries Hobbs concludes his account with the international debate over whether to build a cable car on Mount Sinai and with an unflinching description of the negative impact of tourism on the delicate desert environment His book raises important troubling questions for everyone concerned about the fate of the earth's wild and sacred places *Publications of the American Jewish Historical Society* American Jewish
