Connecting the Units/Connexion des appareils

English

- Before installing, connect the units correctly. Check that the units are the system you require.
 - After connecting is complete, press the clear button on the CD player with the tip of a pen or pin.
 - Be sure to connect the ground lead (black) to the vehicle body or earth when using a power lead to properly ground the chassis. If the ground lead is not properly connected, noise may occur in the system, and the system may not operate correctly.
 - The unit is for vehicles with a 12 volt battery and negative grounding. Before installing it in a replacement vehicle, make sure you check the battery voltage.
 - To avoid shorts in the electrical system, be sure to disconnect the battery (+) cable before beginning installation.
 - Check whether the vehicle's radio and wiring have been connected correctly. Replace the antenna with a replacement that connects the end of the cable to the negative (-) terminal of the battery.
 - Secure the wiring with cable straps or adhesive tape. To protect the wiring, wrap adhesive tape around them where they do not touch each other.
 - Route and secure all wiring so it cannot touch any moving parts, such as the gear shift, handbrake, and door latch. Do not route wiring in places that get hot, such as near the heater outlet. If the insulation of the wiring melts or gets torn, there is a danger of the wiring short-circuiting to the vehicle body.
 - Do not pass the yellow lead through a fuse into the engine compartment to connect to the battery. This will damage the lead itself and create a very dangerous fire.
 - Do not shorten any leads. If you do, you will shorten current life and it will not work properly.
 - Never lead wires in other locations by cutting the insulation of the power supply lead of the unit and tapping into the lead. The current capacity of the lead will be greatly reduced, causing overheating.
 - Replace fuses only with the type required on the fuse holder.
 - Even if the power is cut off because the power cord is disconnected, the unit is powered on if the CD player and/or CD changer are connected to the unit.
- IF YOU CONNECT**
- Use the method when connecting a Multi-CD changer using a separate auto P-Link cable. If you perform this connection, do not connect the unit's P-Link cable directly to an antenna mounting unit. After connecting, be sure to press the clear button.

Français

- Avant l'installation, relier les unités de manière à respecter les spécifications des appareils. Vérifier que les appareils et le câblage fonctionnent correctement.
 - Lorsque le raccordement est effectué, appuyer sur le bouton d'effacement du lecteur CD avec la pointe d'un stylo ou d'une aiguille.
 - Être sûr de connecter le câble de terre (noir) à la carrosserie du véhicule ou à la terre quand on utilise un câble d'alimentation pour correctement grounder le châssis. Si le câble de terre n'est pas correctement connecté, il y aura du bruit dans le système et le système peut ne pas fonctionner correctement.
 - Le produit est conçu pour les véhicules avec une batterie de 12 V et négative à masse négative. Avant de l'installer dans un véhicule, vérifiez la tension de la batterie.
 - Pour éviter les courts-circuits dans le système électrique, assurez-vous de débrancher le câble (+) de la batterie avant de commencer l'installation.
 - Vérifiez si l'installation de la batterie et du câblage ont été effectuées correctement. Remplacez les composants de câblage existants, avec cependant l'antenne de la batterie (-) à la borne négative de la batterie.
 - Fixez le câblage en utilisant des attaches ou de la bande adhésive. Pour protéger le câblage, enveloppez-le avec de la bande adhésive dans les endroits où il ne touche pas les pièces mobiles, comme le levier de changement de vitesse, la pédale de frein ou les loquets des portes. Ne passez pas le câble dans des endroits où il y a du feu, comme près du chauffage. Si l'isolation du câblage fond ou se déchire, il y a un danger de court-circuit du câblage vers la carrosserie du véhicule.
 - N'insérez pas le câble jaune à travers une fusible dans le compartiment du moteur pour le connecter à la batterie. Cela endommagera le câble et créera un incendie très dangereux.
 - N'abrégez pas les câbles. Si vous le faites, vous raccourcirez la durée de vie et le produit ne fonctionnera pas correctement.
 - N'insérez que des fusibles du type requis dans le support des fusibles.
 - Même si l'alimentation est coupée parce que le câble d'alimentation est déconnecté, l'unité est alimentée si le lecteur de CD et/ou le changeur de CD sont connectés à l'unité.
- SI VOUS RACCORDEZ**
- Utilisez cette méthode pour relier un lecteur de CD à un changeur de disque à un câble P-Link séparé. Si vous effectuez cette connexion, ne connectez pas le câble P-Link de l'unité directement à une antenne de montage. Après avoir connecté, assurez-vous de appuyer sur le bouton d'effacement.

IF YOU CONNECT

- Use this method when connecting a Multi-CD changer using a separate auto P-Link cable. If you perform this connection, do not connect the unit's P-Link cable directly to an antenna mounting unit. After connecting, be sure to press the clear button.
