

Pediatric Case Study #1

Burns, C.E., Richardson, B. & Brady, M.A. (2010). Pediatric Primary Care Case Studies. Sudbury, Massachusetts: Jones and Bartlett.

Maya Conteh is a 9 month old who comes to the clinic for an evaluation. She is accompanied by her mother who speaks Arabic and English. The mother expresses concern with Maya's development. The family emigrated from the Sudan 1 year ago and now lives in low income student housing because the father is in graduate school. This is their first child. The maternal grandparents are also temporarily living in the house and help with Maya.

Birth History: Maya was born 11 weeks early, weighing 2 lbs 8 oz. When Maya was just a few days old, she stopped breathing and was placed on a ventilator. After 24 hours she was able to breathe on her own. According to the mother, many tests were run on Maya, but the doctors could find nothing wrong. Maya spent 2 months in the hospital without incident and was discharged to home.

Mother reports: she noticed that Maya drooled a lot and choked easily with her bottle. Now she reports that Maya cannot hold her head up straight, roll or sit without support. She cries a lot and becomes stiff with rage. Mother reports no hospitalizations, surgeries or injuries since discharge.

Is Maya developing "normally?"

- No. Maya cannot hold her head up straight, roll or sit without support.

What developmental milestones would you expect a 9-month-old infant to have achieved?

- Lift head by 2 mo.
- Roll over by 4 mo.
- Roll prone to supine by 4 mo.
- Roll supine to prone by 6 mo.
- Sit independently by 8 mo.
- Crawling by 8 mo.

Rahm, 2006 Children are not simply adults They

commonly present with unique problems that are typically not encountered in older patients These unique problems require the paramedic to alter to some degree his or her approach to the sick or injured child Because a relatively small percentage of EMS calls involve a critically ill or injured child it is common for the paramedic to experience anxiety when such a call is received Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field **Screenplay** Keri Facer,2003 This study sets out to question commonplace assumptions about the use of technology by children at home Bringing together research from the perspectives of psychology sociology education and media studies the authors ask whether we are really witnessing the rise of a new digital generation

Behavioral Aspects of Pediatric Burns Kenneth J. Tarnowski,2013-06-29 In recent years considerable professional attention has centered on the behavioral aspects of various childhood illnesses and injuries Indeed child health psychology has grown exponentially over the past decade One index of this growth is found in the number of texts that have recently appeared in the area Gross Karoly 1988 Krasnegor Arasteh Levine Carey Crocker Routh 1988 Russo Tuma 1982 Varni 1983 In general these texts provide summaries of the psychological literature across a variety of established e g oncology and emerging psychoneuroimmunology areas of child health Until recently many books on the psychological aspects of pediatric health provided no or minimal information about the psychosocial plight of child burn victims In some instances pediatric burns might be mentioned parenthetically as another example of a population for which behavioral treatment procedures e g pain management may be of value In part the relative inattention devoted to this population may be related to the perception that the literature in this area is sketchy and characterized by significant methodological and substantive shortcomings In many instances this perception is largely justified However it is also the case that the pediatric burn literature has evolved considerably over the past decade and that the incidence of and morbidity associated with severe burn injuries mandates immediate and increased attention by mental health professionals Samour & King's Pediatric Nutrition in Clinical Care Susan H Konek,Patricia J Becker,2019-03-12 Samour King s Pediatric Nutrition in Clinical Care Fifth Edition provides comprehensive coverage of the nutritional aspects of pediatric clinical care A widely trusted resource for more than twenty years this text combines coverage of nutrition assessment and care with detailed coverage of normal growth relevant disease states and medical nutrition therapy Case-Smith's Occupational Therapy for Children and Adolescents - E-Book Jane Clifford O'Brien,Heather Kuhaneck,2019-09-26 Selected for Doody s Core Titles 2024 with Essential Purchase designation in Occupational Therapy The number one book in pediatric OT is back Focusing on children from infancy to adolescence Case Smith s Occupational Therapy for Children and Adolescents 8th Edition provides comprehensive full color coverage of pediatric conditions and treatment techniques in all settings Its emphasis on application of evidence based practice includes eight new chapters a focus on clinical reasoning updated references research notes and explanations of the evidentiary basis for specific interventions Coverage of new research and theories new techniques and current trends with additional case

The Ninth Edition integrates the latest research breakthroughs including advances in targeted therapies, immunotherapies and precision medicine. It also expands its in depth coverage of supportive care, symptom management, survivorship and the long term effects of therapy. This award winning text continues to be the essential guide for pediatric oncologists, hematologists, researchers and trainees dedicated to improving outcomes for children with cancer. **Physical Therapy for Children -**

E-Book Robert J. Palisano, Suzann K. Campbell, Margo Orlin, 2014-04-25. Used as both a core textbook in PT programs and as a clinical reference, Physical Therapy for Children 4th Edition provides the essential information needed by PTs, both student and professional, when working with children. Like the previous bestselling editions, the 4th edition follows the practice pattern categories of the Guide to Physical Therapist Practice and uses the ICF model of the disabling process as it presents up to date evidence based coverage of treatment. In this latest edition, Suzann Campbell, DeLapp, Robert J Palisano and Margo N Orlin have added more case studies and video clips, additional chapters and Medline linked references online and Evidence to Practice boxes to make it easy to find and remember important information. Provides comprehensive foundational knowledge in decision making, screening, development, motor control and motor learning, the impairments of body function and structure and the PT management of pediatric disorders. Reflects a family centered care model throughout to help you understand how to involve children and their caregivers in developing and implementing intervention plans. Emphasizes an evidence based approach that incorporates the latest research for the best outcomes. Follows the practice pattern guidelines of the Guide to Physical Therapist Practice 2nd Edition, which sets the standard for physical therapy practice. Features the International Classification of Function, Disability and Health (ICF) of the World Health Organization (WHO) as the model for the disabling process, emphasizing activity rather than functional limitations and participation rather than disability, in keeping with the book's focus on prevention of disability. Provides extensive case studies that show the practical application of material covered in the text and are often accompanied by online video clips illustrating the condition and its management. Makes it easy to access key information with plenty of tables and boxes that organize and summarize important points. Clearly demonstrates important concepts and clinical conditions you'll encounter in practice with over 800 illustrations. Takes learning to a deeper level with additional resources on the Evolve website featuring over 40 video clips that correspond to case studies and demonstrate conditions found in each chapter. Helpful resources including web links, questions and exercises you'll find helpful when preparing for the pediatric specialist certification exam. Dizziness and Vertigo Across
