Pyne,2018-10-23 Fire is special Even

among the ancient elements fire is different because it alone is a reaction. It synthesizes its surroundings; it takes its character from its context. It varies by place, by culture, and by time. It has no single expression. There is no single way to understand it. In this collection of essays, historian and renowned fire expert Stephen J. Pyne offers his reflections on national and global wildland fire management. Pyne distills the long saga of fire on Earth and its role in underwriting an Anthropocene that might equally be called a Pyrocene. Presented through a mixture of journalism, history, and literary imagination, *Here and There* moves the discussion of fire beyond the usual formations of science and policy within a national narrative to one of thoughtful interpretation, analysis, and commentary. Centered on the unique complexities of fire management in a global world, *Here and There* offers a punctuation point to our understanding of wildfire. Included in this volume: How fire policy has changed within the United States; How policy in the United States differs from that in other countries; The history of one of the most famous fire paintings of all time; Suggested next steps for the future of fire research.

Soft Computing for Problem Solving Kedar Nath Das, Jagdish Chand Bansal, Kusum Deep, Atulya K. Nagar, Ponnambalam Pathipooranam, Rani Chinnappa Naidu, 2019-11-27. This two-volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving (SocProS 2018). This conference was a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University, UK, and Vellore Institute of Technology, India, and brought together researchers, engineers, and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions. The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers on algorithms, artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization, and applications in control systems, data mining, and clustering, finance, weather forecasting, game theory, business, and forecasting applications. It offers a valuable resource for both young and experienced researchers dealing with complex and intricate real-world problems that are difficult to solve using traditional methods.
