

18. Is this feedback loop positive or negative feedback? Justify your reasoning.
- Negative feedback since it is going against the stimulus current. The body will try to increase its temperature as a response to a lower temperature in the stimulus.
19. Consider the state of homeostasis: maintaining conditions within certain limits. The body needs multiple mechanisms to keep all organs at optimum in state.
20. Should a positive feedback loop ever be helpful in maintaining homeostasis? Justify your reasoning.
- No, the idea behind homeostasis is to be able to regulate certain variables in the body, whether that is water level or temperature. In order to maintain homeostasis there must be a stimulus without the stimulus will happen. The response should counter the stimulus itself, in order to regulate balance. Therefore, it is impossible to have positive feedback when talking about homeostasis.
21. Should a single negative feedback loop ever be helpful in maintaining homeostasis? Justify your reasoning.
- A single feedback loop is not sufficient in maintaining homeostasis. This can be explained by the fact that the body should have a different response to different variables in a given stimulus. The body needs differently to regulate and keep environmental homeostasis. The body can react differently in order to counter the different variables in temperature.
22. According to Model 1, what is the stimulus and what is the response during childbirth?
- Stimulus: Baby pushing against the cervix.
Response: increase in contractions.
23. When contractions, released from the hypothalamus, increase the intensity of childbirth?
- Yes.
24. When the intensity of contractions increases, will the stimulus increase or decrease?
- When contractions increase, then the pressure in the cervix also increases, creating more contractions until the baby is born.
25. Is childbirth an example of a positive or negative feedback system? Justify your answer.
- Childbirth is an example of a positive feedback loop. The response in this loop helps to increase the stimulus.
26. When will eventually stop the stimulus and thus stop the childbirth feedback loop?
