 Technologies focuses on the prevalent theft of consumer electronics in post Apartheid South Africa Through a material
 culture perspective it explores why these objects have commonly been targeted by bandits and subsequently circulated
 through the criminal underground The author traces ethnographically how devices travel between various social spheres
 delving into the experiences of a range of individuals from diverse residents who fall victim to criminals to the bandits who
 steal electronics for money or drugs the African migrants who export consignments of stolen electronics to their home
 countries the envious residents who buy stolen electronics and finally the police attempting to grapple with the problem
 Dangerous Technologies suggests that electronics have widened digital divides between citizens resulting in underground
 circuits that seek to violently redistribute enviable electronics to low income residents who have not been able to formally
 participate in electronics consumption and use Due to porous borders the widespread theft and redistribution of electronics
 do not only stem from internal inequalities within South African society but also from broader disparities across the African
 continent The book furthers knowledge about how and why particularly modern electronics have precipitated violent
 property crime in democratic South Africa It is relevant to scholars of social and cultural anthropology particularly those with
 an interest in material culture digital anthropology and economic and political anthropology as well as criminologists
