Business Architecture Strategy and Platform-Based Ecosystems Young Won Park, 2017-10-31 This book provides a framework and real case analyses concerning business architecture strategy and platform based ecosystems Firstly the book introduces a framework of business architecture strategy and suggests an engineering process that employs a business architecture analysis system in which the various business best practices information technology IT tools are integrated into an interface More specifically this architecture analysis provides the means to realize two essential features a strategy that allows global firms to sense changing market needs and a tool that combines mechanical engineering with electronics and software IT tools Secondly the book discusses platform based ecosystems Crucial issues for today s firms are associated with value creation through their platform and ecosystem framework With a major emphasis on modular product architecture US firms have focused heavily on platform development in modular industries Their base is operation system OS software so that IT firms in general focus on software capabilities and digital control in particular In contrast the advantage for Japanese firms is not digital but analog control Without any drastic changes in their industry practices Japanese firms are likely to sustain their analog platform advantage The book subsequently puts forward a holistic view through the connection of business architecture strategy and platform based ecosystems The theoretical framework and case illustrations are especially useful to firms involved in a variety of industries

that must respond to the turbulent environmental changes of the digital era Most of the cases target not only Japanese firms but also many other global firms Readers are systematically shown how to balance technological competence and customer competence by using the framework of business architecture strategy and platform based ecosystems **Lithium-Ion**
