

REMANUFACTURING THE SAMSUNG ML-2250 TONER CARTRIDGE

By Mike Josiah

First released in July 2004, the Samsung ML2250 printers are based on a 22ppm, 1200dpi engine.

These cartridges are very similar to the ML1750, but there are differences. The main difference is that some of the ML1750 cartridges have a fuse to reset the printer. The ML2250 cartridges use a series of different chips. The actual ML2250 doesn't use anything but all the rest so far use a special chip. A chart below will list all the different variations.

These images show different views of the cartridge, basically the 2250 series are a bit flatter than other Samsungs.

These cartridges do not have a drum cover, and come new with a piece of heavy paper taped around the cartridge. All new cartridges opened so far have shown some toner leakage on the drum that would have shown on any prints.
