Philosophical Documents in Education Ronald F. Reed, Tony W. Johnson, 2000 Philosophical Documents in Education 2 e masterfully argues that students can better understand and practice their profession by reading contemplating and discussing the great philosophic tradition in education An edited anthology of 18 primary source materials in educational philosophy this text provides a wide range of both historical and contemporary viewpoints **Philosophical Documents in Education** Tony W. Johnson, Ronald F. Reed, 2012 The introduction to the fourth edition of Philosophical Documents in Education asks the simple question what does it mean to be educated That simple but profound inquiry is answered throughout the anthology s 16 chapters by both classical and contemporary educators progressives and philosophers Driven by the idea that students can better understand and practice their profession by reading contemplating and discussing philosophical and historical literature this collection of primary sources exposes readers to a wealth of ideas regarding teaching learning schooling and instruction from ancient texts to modern selections *Principles and Pedagogies in Jewish Education* Barry Chazan, 2021-10-25 This book is aimed at improving contemporary educational practice by rooting it in clear analytical thinking The book utilizes the analytic approach to philosophy of education to elucidate the meaning of the terms education moral education indoctrination contemporary American Jewish education informal Jewish education the Israel experience and Israel education The final chapter of the book presents an educator s credo for twenty first Jewish education and general education This is an open access book Resources in Education , 1999 *Gender Equality in the Philosophy of Education* Connie Titone, 2004 This book offers an extensive introduction to the philosophical work of Catharine Macaulay as expressed in her Letters on Education 1790 It traces the theme of gender and education comparing Macaulay s ideas to those of her contemporaries Jean Jacques Rousseau Hester Chapone and St phanie de Genlis In the process it presents a clear picture of the eighteenth century quarrel that debates the interassociation among gender education and intellectual attainment This book intends to initiate an informed conversation with contemporary readers about Macaulay s work on education within its own historical context so that fair assessments of her work can be made It also argues that any complete history of the philosophy of education must include Macaulay s work Plato's Timaeus and the Biblical Creation Accounts Russell E. Gmirkin, 2022-05-02 Plato s Timaeus and the Biblical Creation Accounts argues that the creation of the world in Genesis 1 and the story of the first humans in Genesis 2 3 both draw directly on Plato s famous account of the origins of the universe mortal life and evil containing equal parts science theology and myth This book is the first to systematically compare biblical Ancient Near Eastern and Greek creation accounts and to show that Genesis 1 3 is heavily indebted to Plato s Timaeus and other cosmogonies by Greek natural philosophers It argues that the idea of a monotheistic cosmic god was first introduced in Genesis 1 under the influence of Plato s philosophy and that this cosmic Creator was originally distinct from the lesser terrestrial gods including Yahweh who appear elsewhere in Genesis It shows the use of Plato s Critias the

sequel to Timaeus in the stories about the Garden of Eden the intermarriage of the sons of God and the daughters of men and the biblical flood This book confirms the late date and Hellenistic background of Genesis 1 11 drawing on Plato s writings and other Greek sources found at the Great Library of Alexandria This study provides a fascinating approach to Genesis that will interest students and scholars in both biblical and classical studies philosophy and creation narratives The Comprehensive Handbook of Constructivist Teaching James Pelech,2010-02-01 While many people talk about the Constructivist philosophy there has not been a publication that provides a detailed description of what a Constructivist classroom sounds like and looks like This book fills that void by examining the philosophy translating it into teaching strategies and providing over forty examples These examples come from the elementary level up to and including the collegiate level and include all content areas These examples show how the Constructivist educator uses the linguistic mode the visual mode and the kinesthetic mode to create a class environment in which the Constructivist philosophy flourishes Examples of student work are provided the book also includes chapters on note taking Problem Based Learning PBL action research and other Constructivist resources Written in user friendly form this book presents a concrete and step by step approach for translating the Constructivist philosophy into classroom practice This book is intended for every Constructivist researcher practitioner and teacher educator The researcher and teacher educator will benefit from topics such as the history of Constructivist thought the principles of Constructivism and action research This book is more than a list of recipes and this will be beneficial to the practitioner Starting with the principles of Constructivism and bridging to four basic teaching strategies the practitioner is guided on how to use different learning modes and meta strategies to create a true Constructivist practice An educator s life is made up of one s philosophy teaching principles daily strategies resources and research tools This book provides an in depth look from the Constructivist perspective at each one of these components In every sense of the word this book is truly comprehensive *Mindful Practice for Social Justice* Raquel Ríos,2019-03-28 This book is designed to help you bring mindfulness and social justice to the forefront of your education practice so you can work toward self actualization and social transformation Author Raquel R os offers instructional practices coaching strategies and implementation tools to help you activate mind body and spirit on your journey to making real changes toward equity in your school or classroom What s Inside Chapter 1 explains the importance of realizing one s powers and how power increases when we discover its purpose and utility in society Chapter 2 introduces you to the three domains of Peak Learning Experience Personal Social and Transpersonal that lead to the targeted practices of Authentic Presence Freedom and Emergence and discusses how bias can limit our ability to see the truth in people and situations Chapters 3 5 delve into each domain offering strategies activities reflection questions and application to practice tools Chapter 6 discusses the importance of building the right team and the need to change how we recruit talent if we want to innovate our profession With the powerful reflection tools and activities in this book you and your teams will feel more equipped and supported on your path

A Cyclopedia of Education Paul Monroe, 1913

Kirylo, 2021-04-15 A thoughtful teacher is one who works to foster an inspiring classroom environment where students fall in love with learning Indeed it is incumbent on the teacher to understand self to be prepared to possess command of subject matter to teach in a developmentally appropriate manner to mindfully incorporate culturally relevant practices and to illuminate a sense of connection with a diverse student population In that light The Thoughtful Teacher Making Connections with a Diverse Student Population highlights the critical importance of what it means to thoughtfully teach emphasizing that a central aspect toward transformation in education is through the dedicated efforts of thoughtful teachers Written in accessible language and making clear the important connection between theory and practice this book is an informative text for teachers teacher educators school administrators and those who have an interest in education

Charting Reform, Achieving Equity in a Diverse Nation Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how

these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens

Teaching with Purpose James D. Kirylo, 2016-05-02 For five days a week for approximately nine months out of the year totaling countless hours teachers work with other people s most treasured gifts their children That the teacher is the most important element in fostering an energetic engaging and inspiring classroom environment where authentic learning can unfold cannot be overstated Indeed it is the teacher who understands self or does not it is the teacher who is prepared or is not it is the teacher who has command of subject matter or does not it is the teacher who inculcates in an appropriate way or does not and it is the teacher who is patient understanding empathetic and enthusiastic or is not To that end Teaching With Purpose underscores what it means to be an insightful teacher foundationally emphasizing that the central aspect toward richly transforming education is through the professionalization of what it means to be a teacher Written in accessible language and attentive to connecting theory to practice the benefits and features of this book are mindful of a diverse readership

The Concept of Woman Prudence

Allen, 2006-01-26 The culmination of a lifetime's scholarly work this study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present This volume is the second in her study in which she explores claims about sex and gender identity in the works of over fifty philosophers both men and women in the late medieval and early Renaissance periods

Social Structuration in Tibetan Society Jia Luo, 2016-12-20 This volume is unique in the literature concerning both the sociology of education and Tibetan society It aims to propose a Tibetan sociology of education something that no other author has attempted as well as to provide insights into the nature of Tibetan society both historically and currently through the application of Giddens structuration theory supplemented by the work of ancient Tibetan philosopher Je Tsongkhapa Previous Western accounts of Tibetan history and society have lacked insider perspectives as well as access to original documentation in the Tibetan language The author of this volume is Tibetan and does not experience these limitations He has also taught sociology at the university level and in 1999 published a general textbook on sociology in Tibetan which attempted to draw on Western theories and apply them to the Tibetan context In short the author appears to be highly credible in taking on this extremely ambitious project
