

PLACEMENT AND DIRECTION

(PRIMARY AND SECONDARY SUBJECT PLACEMENT)

RULE OF THIRDS:

The simplest case. Align the subject or graphic line in or along the Rule of Thirds guide.

This is a common and pleasing composition. Lots of space is given for a flow in a rightwards or downwards direction. If the subject is a lighthouse on a bluff, this dramatizes the distance to fall from the top of it, and the airy view.

A variant exists with power points spaced slightly tighter around the centre, following the Golden Mean ratio instead of Thirds.

DIAGONAL:

Used for leading lines and is often paired with RoT for subject placement. Two subjects on a diagonal often imply a relationship like a comparison or contrast.

Diagonals can be used with shallow depth of field to let the secondary subject give context to the first. They can also imply that time has passed, such as two subjects in different ascension of stairs, or a direct contrast as in the example.

SYMMETRY:

The main subject is placed along a symmetric centre. Secondary subjects are mirrored in the division or balanced in relation to it; thus, secondary subjects should be equal in meaning to maintain balance.

This example also uses a triangular composition. Symmetry usually implies unity and stability in the subjects but an overall direction of motion may be implied by leading lines or the context - e.g. a rocket travels upwards.

GOLDEN TRIANGLE:

A more advanced form of RoT that takes leading lines and areas into account; the focus is in Rule of Thirds position, the lines make sense of the surroundings. This composition is about making use of corners and the connecting geometry between subjects.

The straight line is often considered "fast", and the triangle by the point is often considered "anchored" or "static".

TRIANGULAR:

A closed curve is formed by three dividers or the lines between subjects. This curve leads the eye around the frame, but can also be used to pick out primary subjects along it.

Extending the lines of the triangle should result in an intersection with a compositional point, like a corner or Rule of Thirds position.
