

Getting Started: Open the PhET Simulation called Faraday's Electromagnetic Lab.
(If doing this from home, you will need to go here and play the simulation online:

http://phet.colorado.edu/simulations/sims.php?sim=Faradays_Electromagnetic_Lab

Procedures:

A. Bar Magnet

1. Here you will find a compass and a bar magnet. What do the two have in common?

2. Slowly move the compass around the bar magnet. What observations do you make? How can you explain what you are witnessing?

3. Increase and decrease the strength of the bar magnet (use slider) and continue to slowly move the compass around the bar magnet. What effect does changing the magnet's field strength appear to have on the compass?

4. Place the compass next to the South Pole of the bar magnet and press the Flip Polarity button. What happens to the magnet and the compass?

5. Click See Inside Magnet. What do you see?

6. Click Show Field Meter and move the meter around. In what position does $\vec{B}$ have the greatest magnitude? When does it get weaker?

7. Where is B_x positive? _____ Where is it negative? _____
Where is B_y positive? _____ Where is it negative? _____
8. Place the meter at a location to the left and underneath the bar magnet. What are the B_x , B_y and B values? Verify the mathematical relationship between the three.

Phys Faraday Phet Sim Lab Answers:

Brain-powered Science Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of surprises and should be both meaningful and fun for students
