The purpose of this book is to explore meaningful integrations of developmental processes and functioning with conceptualizations of context a term traditionally denoting physical settings social arenas or perceptual or social backdrops in relation to a focal point However the study of context has taken a considerably more unique and vibrant form in recent years the term is becoming more than a substitute for background independent variables Rather the contributions of context to behavior thought feelings and vice versa are becoming central issues in many research domains This text is a collection of empirical and theoretical accounts for understanding context its focus is on integrating the study of context with the science of developmental psychology Although the authors work in many different areas of the field and with different populations they all converge on a central methodological conceptual theme of contextualism which is presented as the dynamic integration of intraindividual factors with environmental and social environmental factors      *Educart TERM 1 SCIENCE*

Seth L. Sanders,2014-04-28 Until very recently the idea of ancient Jewish sciences would have been considered unacceptable Since the 1990s Early Modern and Medieval Science in Jewish sources has been actively studied but the consensus was that no real scientific themes could be found in earlier Judaism This work points them out in detail and posits a new field of research the scientific activity evident in the Dead Sea Scrolls and early Jewish pseudepigrapha The publication of new texts and new analyses of older ones reveals crucial elements that are best illuminated by the history of science and may have interesting consequences for it The contributors evaluate these texts in relation to astronomy astrology and physiognomy marking the first comprehensive attempt to account for scientific themes in Second Temple Judaism They investigate the meaning and purpose of scientific explorations in an apocalyptic setting An appreciation of these topics paves the way to a renewed understanding of the scientific fragments scattered throughout rabbinic literature The book first places the Jewish material in the ancient context of the Near Eastern and Hellenistic worlds While the Jewish texts were not on the cutting

edge of scientific discovery they find a meaningful place in the history of science between Babylonia and Egypt in the time period between Hipparchus and Ptolemy The book uses recent advances in method to examine the contacts and networks of Jewish scholars in their ancient setting Second the essays here tackle the problematic concept of a national scientific tradition Although science is nowadays often conceived as universal the historiography of ancient Jewish sciences demonstrates the importance of seeing the development of science in a local context The book explores the tension between the hegemony of central scientific traditions and local scientific enterprises showing the relevance of ancient data to contemporary postcolonial historiography of science Finally philosophical questions of the demarcation of science are addressed in a way that can advance the discussion of related ancient materials Online edition available as part of the NYU Library's Ancient World Digital Library and in partnership with the Institute for the Study of the Ancient World ISAW

Weinstein

Robert L. Oprisko, Diane Rubenstein, 2014-12-05 This book is a major reassessment of Michael Weinstein's political philosophy. It situates his singular contribution designated as critical vitalism in the context of both canonical American and contemporary continental theory. Weinstein is presented as a philosopher of life and as an American Nietzsche. Yet the contributors also persuasively argue for this form of thinking as a prescient prophecy addressing contemporary society's concern over the management of life as well as the technological changes that both threaten and sustain intimacy. This is the first full-scale study of Weinstein's work which reveals surprising aspects of a philosophic journey that has encompassed most of the major American pragmatic or vitalist or Continental phenomenological or existential traditions. Weinstein is read as a comparative political theorist, a precursor to post-structuralism and as a post-colonial border theorist. A different aspect of his oeuvre is highlighted in each of the book's three sections. The opening essays comprising the Action diptych contrast meditative versus extrapolative approaches. Contemplation stages a series of encounters between Weinstein and his philosophic interlocutors. Vitalism presents Weinstein as a teacher, media analyst, musician and performance artist. The book contains an epilogue written by Weinstein in response to the contributors.
