**School Science Practical Work in Africa** Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

### **Foundation and Growth of Macromolecular Science**

Meegle S. Mathew, Józef T. Haponiuk, Sabu Thomas, 2024-02-20. This new volume explores the foundation of macromolecular science along with the field's current challenges and solutions to challenges. The book discusses many new applications that have emerged recently based on different polymers and their composites including some on the application of polymer composite in electromagnetic interference (EMI) shielding, sensing and wound healing. This book discusses innovations in the synthesis and characterization of many different classes of polymers and provides in depth explanations of the behavior of polymers in solutions and in bulk. It considers the synthesis, characterization, properties and applications of many polymer composites and nanomaterials. The diverse topics cover zein based composites, nanocellulose extracted as a potential filler for polymers, polymers to strengthen concrete, polymer metal nanocomposites, magnetic materials, synthetic polymers in aquatic environments, pharmaceutical 3D printing, alginate based wound healing dressings and more. Many chapters in the volume place emphasis on sustainable development and green, eco friendly approaches. This volume will help researchers to understand the significance of macromolecular science and research advances for sustainable development for the benefit of humanity. It emphasizes the many roles of macromolecular science in the important fields of science such as chemistry, physics, engineering, biology, pharmaceutical science and more.

### **Environmental and occupational exposure and**

**chronic diseases**. Raquel Alarcon Rodriguez, Sara Rojas, Jessica García González, Mar Requena Mullor, 2025-03-27. Studying the impacts of risk factors both environmental and occupational could lead to a better understanding of the adverse effects on the health of the population as well as their medium and long term consequences. Identification of at risk populations, early diagnosis and prognosis prediction play major roles in preventing or reducing the burden of chronic illness. Addressing chronic disease is a major challenge for healthcare systems worldwide requiring a long period of supervision, observation, care and/or rehabilitation. The health effects caused by occupational exposures are a cause for concern worldwide so it is important to analyse the relationships between work and health, identifying the risk factors that may cause impact to workers.
