Developing and Validating Test Items Thomas M. Haladyna,Michael C. Rodriguez,2013-07-18 Since test items are the building blocks of any test learning how to develop and validate test items has always been critical to the teaching learning process As they grow in importance and use testing programs increasingly supplement the use of selected response multiple choice items with constructed response formats This trend is expected to continue As a result a new item writing book is needed one that provides comprehensive coverage of both types of items and

of the validity theory underlying them This book is an outgrowth of the author's previous book *Developing and Validating Multiple Choice Test Items* 3e Haladyna 2004 That book achieved distinction as the leading source of guidance on creating and validating selected response test items Like its predecessor the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field It is very timely in this era of burgeoning testing programs especially when these items are delivered in a computer based environment Key features include Comprehensive and Flexible No other book so thoroughly covers the field of test item development and its various applications Focus on Validity Validity the most important consideration in testing is stressed throughout and is based on the Standards for Educational and Psychological Testing currently under revision by AERA APA and NCME Illustrative Examples The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items Strategies for training item writers and developing large numbers of items using algorithms and other item generating methods are also presented Based on Theory and Research A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors **Library of Congress**

Subject Headings, 2009 **Resources in Education**, 1988 Serves as an index to Eric reports microform *Portfolios in the Classroom* Beth Schipper, Joanne Rossi, 1997 The wonderful effect of the portfolio process is the self awareness that develops when kids generate their own selection criteria make decisions and reflect on their work When students discuss what they want to include in their portfolio and why and analyze which project or piece of writing meets those criteria they are creating connections to learning far beyond the scope of traditional forms of assessment Portfolios also increase learning because students take responsibility for their learning actively engage in the learning process think about their own thinking grow in confidence and self esteem set goals for future learning Using portfolios enables teachers to be clearer in their presentation of instructional strategies Using examples from real portfolios and successful classroom experiences Beth and Joanne take you step by step through helping children create portfolios that reveal accurate assessments of their own work *Portfolios in the Classroom* features instructional ideas that extend your use of portfolios questions throughout the text that guide you to key ideas real student examples from classrooms where teachers have successfully used portfolios samples to illustrate discussion of each element in the process end of chapter summaries and a complete bibliography reproducible forms for you and your students to use recommendations for using portfolios as a tool for parental involvement This is a book full of ideas and suggestions that you can put to use immediately in your classroom **Making Progress in Primary**

Science Wynne Harlen, 2003 This new and extensively revised edition of *Progress in Primary Science* is intended for all those involved in training teachers of primary school science both preservice and on INSET courses Its flexible modular structure enables course leaders to tailor their course to participants needs Each module can be studied individually or as part of an extended programme and contains notes for facilitators photocopiable workshop materials activities for practitioners and

suggestions for further reading Throughout the book the focus is on the learning of science as an investigative process through which pupils develop an understanding of ideas This is supported by modules on different aspects of teaching and learning in science including building on children s own ideas how to ask and answer questions managing practical work in the classroom science for very young children effective assessment self assessment and feedback cross curricular links ICT and science science outside the classroom The companion study book currently available can be used by those participating on these courses It follows the same modular structure and contains the same information as this book and makes planning and delivering the course easier and less time consuming for the course leader
