

Plates, earthquakes and volcanoes Test

- 3 You have learnt that the surface of the earth is broken up into pieces called plates, and that these move because they float on top of the mantle. Look at this map (you have seen it before in your textbook).

Use this map to help you answer these questions:

a What plate is Britain on? _____ [1 mark]

b Name two plates which are moving apart from each other. _____ [1 mark]

c Name two plates which are crashing into each other. _____ [1 mark]

d Why do you think the USA and the UK are getting further apart? _____ [2 marks]

- 4 Sometimes plates pull apart from each other. Here is a flow diagram about this, but the drawings are missing. You need to put a diagram in each box. Remember to add labels showing the **names of the plates**, the **directions** they are moving in, and what happens in-between. [6 marks]

The plates are pulled apart by convection currents in the mantle. Earthquakes would happen here.

Magma rises in the gap between the two plates, and starts to harden into basalt.

The gap gets bigger, with new crust made of basalt forming in the middle.

Plate Tectonics Notes Part Middle School Science

ML Morrison

Plate Tectonics Notes Part Middle School Science:

Embark on a transformative journey with is captivating work, **Plate Tectocinc Notes Part Middle School Science** . This enlightening ebook, available for download in a convenient PDF format , invites you to explore a world of boundless knowledge. Unleash your intellectual curiosity and discover the power of words as you dive into this riveting creation. Download now and elevate your reading experience to new heights .
