Practice Exponential Transformations Key:

Exponential Transformation Salim Ismail, Francisco Palao, Michelle Lapierre, 2018-10-30 Today's top business challenge is adapting to accelerating technological change. We are in the early stages of the Fourth Industrial Revolution characterized by the convergence of new exponentially advancing technologies that blur the lines between physical, digital, and biological realms. The results are a complete uprooting of industries the world over as entire production management and governance systems are impacted. The best-selling book *Exponential Organizations* by Salim Ismail explained why we are seeing the emergence of a new kind of organization, the Exponential Organization, that thrives in the face of industry disruption and achieves its own exponential growth. Since the release of *Exponential Organizations* in 2014, Salim Ismail, Francisco Palao, and Michelle Lapierre have been working with leading organizations around the world, including Procter & Gamble, Unilever, Visa, Stanley Black & Decker, and Hewlett Packard, to help them apply Exponential Organization principles to avoid being disrupted and to take the lead in disrupting their own and other industries. The result is a ten-week process called the ExO Sprint that speeds up transformation while blocking the natural immune system response that organizations must overcome in order to successfully transform themselves. Salim's first bestseller was focused on why Exponential Organizations exist today. *Exponential Transformation* is a detailed handbook for applying Exponential Organization principles, giving individuals and organizations a step-by-step approach to follow to become their own ExO.
