Prairies Herbivores Territoires Quels Enjeux:

Prairies, herbivores, territoires : quels enjeux ? Claude Béranger, Joseph Bonnemaire, 2008-11-07 Dans un contexte mondial qui fragilise les productions d herbivores des pays européens cet ouvrage interdisciplinaire coordonné par l Académie d Agriculture de France montre la réalité et l importance de la multifonctionnalité des prairies et en souligne les enjeux politiques. Ainsi les prairies contribuent elles très fortement à la préservation des sols, de la biodiversité, de la qualité des eaux et des paysages, à la régulation des régimes hydriques mais aussi aux qualités des produits laitiers et carnés des herbivores. Dans cet ouvrage destiné à un large public de décideurs, d acteurs du développement territorial et agricole d étudiants et enseignants les auteurs mettent en évidence les performances écologiques et économiques des systèmes herbagers et plaident pour une démarcation de la qualité des produits par des signes officiels. Ils soulignent l importance des politiques publiques territoriales de soutien pour assurer la viabilité économique des exploitations d élevage d herbivores, celles-ci doivent reconnaître et rémunérer les services sociétaux rendus par ces systèmes de production.

Prairies, herbivores, territoires, 2008 *Quels paysages avec quels paysans ?* Jacques Brossier, 2008-10-31 Paysages et paysans ont partie liée. Prendre en compte les pratiques des agriculteurs pour comprendre les transformations du paysage est une nécessité des politiques publiques. Dès les années 1970, alors que l intérêt paysager était encore très marginal, une quinzaine d agronomes a relevé le défi de cette recherche pluridisciplinaire et publié en 1977 les résultats de son étude dans *Pays paysans paysages dans les Vosges du Sud*, ouvrage réédité en 1995. Fait rare, ces chercheurs sont revenus sur leur terrain trente ans plus tard pour observer l évolution des paysages de la région, revoyant ainsi leurs analyses et actualisant leurs propositions.

Europe laitière André Pflimlin, 2010 L élevage laitier reste une activité économique majeure pour le maintien de l emploi et du tissu rural dans près de la moitié des régions européennes. Il valorise un tiers des surfaces agricoles, notamment en zones défavorisées, contribuant aussi à la production de biens publics essentiels : l eau, l air, le sol, la biodiversité et le paysage. Et pourtant l Europe laitière s enferme dans une double impasse : impasse socio-économique d abord. Alors que la plupart des grands pays confortent leur marché interne, l Europe a décidé d abandonner la préférence communautaire et les quotas laitiers. Elle s aligne sur les règles de l OMC, espérant renforcer sa place sur un marché mondial de beurre et de poudre marginal en volume et en valeur. Ce faisant, elle accentue la volatilité du prix du lait et impose une compétition mortelle pour la majorité des producteurs. Impasse environnementale et territoriale ensuite. Avec le modèle Holstein, mais aussi la PAC, a favorisé la spécialisation et l aggrandissement des troupeaux, ainsi que leur concentration dans les plaines labourables, aux dépens des zones herbagères et des races plus rustiques produisant du lait et de la viande. La fin des quotas va amplifier l industrialisation et la concentration, accélérant l exode rural et le changement climatique, mais aussi la perte de biodiversité et de patrimoine culturel, notamment dans les nouveaux pays membres. Pour sortir de cette double impasse et pour préserver une Europe et une planète vivables pour nos enfants, il faut opter clairement pour la souveraineté alimentaire, celle des 500 millions d Européens et celle des pays en développement. Il faut aussi

encourager un levage valorisant davantage les prairies et les ressources locales Il n'est pas trop tard pour décider d'une autre politique laitière et rurale plus conforme au traité de Lisbonne avec le soutien du Parlement européen et la mobilisation de tous

Comment réconcilier agriculture et littoral ? Chantal Gascuel, Laurent Ruiz, Françoise Vertès, 2015-01-20 Chantal Gascuel agrohydrologue à l'Inra de Rennes étudie les relations entre agriculture paysage et qualité des eaux Elle est responsable des questions du sol et de l'eau la direction scientifique Environnement de l'Inra Laurent Ruiz agrohydrologue à l'Inra de Quimper étudie les relations entre les systèmes agricoles et l'eau dans différents contextes Bretagne Inde du Sud France Vertès agrologue à l'Inra de Quimper étudie les systèmes agricoles en particulier ceux liés à la prairie typologie des systèmes évaluation de leurs impacts

Élevages et environnement Sandrine Espagnol, Philippe Leterme, 2010-10-14 L'analyse des bonnes pratiques d'élevage de l'impact des stratégies alimentaires et des stratégies de gestion des effluents ou encore des méthodes et outils d'évaluation environnementale applicables aux élevages permet de répondre la question de la cohabitation entre élevages et environnement Conçu par des spécialistes dans le cadre du RMT élevages et Environnement cet ouvrage illustre clairement les débats actuels sur les élevages et leurs évolutions

Nouveaux rapports à la nature dans les campagnes François Papy, 2012-05-23 Persuadés que nous vivons aujourd'hui une période de transition écologique les auteurs de cet ouvrage sont partis en quête des signes d'émergence de nouveaux rapports à la nature conscients qui sont encore balbutiants Et surtout peu connus Ils ont choisi de le faire dans les campagnes n'est-ce pas là que se trouvent les ressources naturelles les plus présentes et que la question des usages qu'en font les habitants est la plus pertinente Aussi par une démarche qui rompt avec les abondantes études rurales et les plus récents travaux de prospective ont-ils rassemblé dix études de cas diverses mais significatives demandant aux auteurs de repérer des comportements individuels et collectifs qui en sont cartant de l'équivalence faite communément entre campagne paysage et belle et bonne nature sont des indices d'une évolution de la manière de penser et de pratiquer c'est-à-dire d'habiter la nature dans les campagnes aujourd'hui Ces études de cas révèlent des initiatives individuelles associatives et institutionnelles témoignant de la prise de conscience qu'il faut reconsidérer les rapports de la société à la nature Initiatives la plupart peu nombreuses disséminées et souvent mal coordonnées par manque de dispositifs démocratiques qui relèvent pourtant des biens communs Destinée à la communauté scientifique cet ouvrage devrait aussi intéresser les décideurs agricoles industriels politiques associatifs qui sont acteurs dans cette transition écologique

Qu'est ce que l'agriculture écologiquement intensive? Michel Griffon, 2013 Un développement agricole durable écologique plus productif et rentable peut voir le jour Conduire une production agricole abondante tout en améliorant la qualité de l'environnement est désormais possible Historique d'une longue histoire de pensées et de recherches le terme agriculture écologiquement intensive définit une agriculture qui utilise intensivement les fonctionnalités des systèmes productifs Dans cet ouvrage l'auteur nous montre que la combinaison et l'amplification de fonctionnalités écologiques peuvent créer des synergies productives tout en réduisant les atteintes à l'environnement Editeur

Quelles innovations pour quels systèmes d'élevage ? Stéphane

Ingrand, René Baumont, 2014-08-18 Partant des questions générales sur la conception innovante et l'évaluation des systèmes ce numéro explore différents leviers de changements radicaux qui sont en germe dans le secteur de l'élevage : élevage de précision, écologie industrielle, agroécologie avec leurs déclinaisons : capteurs, appareils sur les animaux, élevage de poissons avec de l'eau recyclée, systèmes laitiers bas intrants. Deux articles complètent le panorama en s'intéressant au repérage des innovations dans les exploitations d'élevage en France et aux dynamiques diversifiées d'innovation et de changement en Afrique. *Livres hebdo*, 2008
