

RICETRASMETTITORE PHILIPS "CALLPAC" PRC/VRP 2000 TACTICAL HF RADIO

Federico Baldi, IZ1FID

Dopo la descrizione del Racal PRM-4031, della PRC-515, voglio portare alla vostra attenzione un altro ricetrasmittitore portatile ("manpack") di progettazione e costruzione ancora più recente: il CALLPAC PRC-2000 di co-produzione belga (PHILIPS) ed inglese (MEL)

Il Callpac, realizzato nella seconda metà degli anni 80 (il manuale tecnico riporta la data del 1986) e prodotto sino a tutti gli anni 90 è un ricetrasmittitore per onde corte (HF), portatile, finalizzato alla trasmissione in voce (SSB), telegrafia (CW) o dati con una copertura sino a 30km per onda di terra, ovviamente sostituendo all'antenna verticale un dipolo si ottiene una notevole estensione del raggio di copertura. Analogamente ad altri apparati della sua categoria è stato concepito al fine di consentire sia un impiego

portatile che per essere utilizzato in sistemi veicolari o fissi ove è previsto l'uso di un finale di potenza rispettivamente di 100 e 400 W. A tale proposito vale la pena di fare una considerazione: gli apparati, come PRM-4031 e PRC-2000, per i quali è stato previsto un uso esteso (non solo portatile) risultano essere particolarmente curati nella loro sezione ricevente.

Tornando al CALLPAC PRC-2000 le caratteristiche salienti sono rappresentate dal fatto che l'unità consente l'utilizzo a singolo o doppio operatore, l'uso

Monthly Catalog of United States Government Publications ,2000 **Practical Spoken Dialog Systems** Deborah Dahl,2007-09-28 For professional speech researchers there is a rich technical literature covering many years of primary research in speech However this literature is not necessarily applicable to the needs of business people application developers and students who are interested in learning about the practical uses of speech technology On the other hand while existing introductory resources cover the basic mechanics of development of application development as well as aspects of the voice user interface they don t go far enough in dealing with the details that have to be taken into account to make spoken dialog systems successful in practice What s missing is information in between the in depth technical literature and the more introductory development resources The goal of this book is to provide information for anyone who wants to take the next step beyond the basics of current speech applications but isn t yet ready to dive into the technical literature It is hoped that this book will help project managers application developers and students gain a fuller and more complete understanding of spoken dialog technology and the practical aspects of developing and deploying spoken dialog applications

an initiative that forces monks and nuns to participate in propaganda sessions and repeat official dogma Powers contextualizes this within a larger campaign to transform China's religions into patriotic systems that endorse Communist Party policies This book offers a powerful comprehensive examination of this ongoing phenomenon how it works and how Tibetans resist it *By United States Army: Tactical Radio Operations* United States Army, 2018-10-02 This field manual FM 6-02.53 Tactical Radio Operations serves as a reference document for tactical radio systems It does not replace FM's governing combat net radios unit tactical deployment or technical manuals TMs on equipment use It also provides doctrinal procedures and guidance for using tactical radios on the modern battlefield This FM targets operators supervisors and planners providing a common reference for tactical radios It provides a basic guidance and gives the system planner the necessary steps for network planning interoperability considerations and equipment capabilities *Operator's Manual*, 1983
