September 2009 Cluj-Napoca, Romania Simona Vlad, Radu V. Ciupa, Anca I. Nicu, 2010-02-01 Projections for advances in medical and biological technology will transform medical care and treatment This in great part is due to the result of the interaction and collaboration between medical sciences and engineering These advances will result in substantial progress in health care and in the quality of life of the population Frequently however the implications of technologies in terms of increasing recurrent costs additional required support services change in medical practice and training needs are underestimated As a result the widespread irrational use of technologies leads to a wastage of scarce resources and weakens health systems performance To avoid such problems a systematic and effective Health Technology System must be developed and introduced requiring the support and commitment of decision makers of all levels of the health system The MediTech2009 conference aims to provide a special opportunity for the Romanian professionals involved in basic research R D industry and medical applications to exchange their know how and build up collaboration in one of the most human field of science and techniques The conference is intended to be an international forum for researchers and practitioners interested in the advance in and applications of biomedical engineering to exchange the latest research results and ideas in the areas covered by the topics and not only We believe the reader will find the proceedings an impressive document of progress to date in this rapidly changing field *H.R. 50 : compilation of markups before the Committee on Science, One Hundred Ninth Congress, first session, December 31, 2006 ,2007*

Sacred Subdivisions Justin Wilford, 2012-11-19 In an era where church attendance has reached an all time low recent polling has shown that Americans are becoming less formally religious and more promiscuous in their religious commitments Within both mainline and evangelical Christianity in America it is common to hear of secularizing pressures and increasing competition from nonreligious sources Yet there is a kind of religious institution that has enjoyed great popularity over the past thirty years the evangelical megachurch Evangelical megachurches not only continue to grow in number but also in cultural political and economic influence To appreciate their appeal is to understand not only how they are innovating but more crucially where their innovation is taking place In this groundbreaking and interdisciplinary study Justin G Wilford argues that the success of the megachurch is hinged upon its use of space its location on the postsuburban fringe of large cities its fragmented dispersed structure and its focus on individualized spaces of intimacy such as small group meetings in homes which help to interpret suburban life as religiously meaningful and create a sense of belonging Based on original fieldwork at Rick Warren's Saddleback Church one of the largest and most influential megachurches in America Sacred Subdivisions explains how evangelical megachurches thrive by transforming mundane secular spaces into arenas of religious significance *Resources in Education ,1992* **American**
