Story Starter:

There was the first time to leave the school library. The first around town, figuring through an old, redneck book that he found tucked behind a row of dusty encyclopedias. The room had no air, but the pages were filled with vibrant handwriting, almost like a story.

As he turned to the last entry, the words seemed to glow faintly under the dim light.

"The afternoon would find... I hope you are ready?"

The light flickered. A sudden gust of wind rustled the pages.

Lines started moving.

The library doors were closed.

And he was no longer there?

2 Write down your choices in the space below. Use a separate piece of paper to write your story.

Iurgel, Nelson Zagalo, Paolo Petta, 2009-11-24. The rich programme of ICIDS 2009, comprising invited talks, technical presentations and posters, demonstrations and co-located post-conference workshops, clearly underscores the event's status as premier international meeting in the domain. It thereby confirms the decision taken by the Constituting Committee of the conference series to take the step forward out of the national cocoons of its precursors ICVS and TIDSE and towards an itinerant platform reflecting its global constituency. This move reflects the desire and the will to take on the challenge to stay on the lookout, critically reflect upon and integrate views and ideas, findings and experiences and to promote interdisciplinary exchange while ensuring overall coherence and maintaining a sense of direction. This is a significant enterprise. The challenges sought are multifarious and must be addressed consistently at all levels. The desire to involve all research communities and stakeholders must be matched by acknowledging the differences in established practices and by providing suitable means of guidance and introduction, exposition and direct interaction at the event itself and of lasting and increasingly living documentation of which the present proceedings are but an important part.

Interactive Storytelling Antonio Pizzo, Vincenzo Lombardo, Rossana Damiano, 2023-09-21. Taking a cross-media approach to the ever-changing field of digital storytelling, this book offers an essential introduction to producing and editing interactive storytelling content and to the platforms that host it. Merging algorithmic and AI approaches with basic writing technique, the authors begin by providing a brief history of the field before moving on to practical step-by-step guides on techniques, models and software architectures. Examples and exercises are drawn from free-to-access purpose-built software created by the authors as well as exemplary interactive storytelling work. Assuming the perspective of the storyteller and focusing on elements shared across different fields of professional communication, the book is designed to be a primer for digital communicators irrespective of the medium they are working with. As such, the methods provided will be applicable across the spectrum of TV, film, videogames, web and mobile storytelling. *Interactive Storytelling* is recommended reading for professionals as well as advanced undergraduate and postgraduate students of interactive entertainment, multimedia design and production and digital journalism.
