The contractor must carefully manage both in order to have a successful outcome and protect the company's interests and assets. This book will help you manage all these elements of the contract: Scope of work and schedule, Terms of payment and cash flow, Assurances of performance, Insurance, bonding, indemnity, and warranties, Changes to the contract, Disputes and their resolution, Damages, Termination, and suspension, Force majeure, International contracting. How to Establish a Document Control System for Compliance with ISO 9001:2015, ISO 13485:2016, and FDA Requirements Stephanie L. Skipper, 2015-10-12 This book explains the requirements for compliance with FDA regulations and ISO standards 9001 13485 for documented information controls and presents a methodology for compliance. The document control system (DCS) or documented information control system (DICS) is the foundation of a quality management system. It is the first quality system element that must be implemented because the establishment and control of documented processes and information in a quality controlled environment is dependent on the ability to proactively manage access to documents and the movement of documents through the document life cycle. A well-developed document control system benefits business by: Improving knowledge retention and knowledge transfer within and across business units; Improving access to knowledge-based information; Improving employee performance by providing standardized processes and communicating clear expectations; Improving customer communication and satisfaction by providing documented information from which common understanding can be achieved; Providing traceability of activities and documentation throughout the organization; Improving organization of and access to documents and data. Sample documents are included in the appendixes of this book to help clarify explanations. This book provides a process-based approach that can be used for controlling all forms of documented information that are required to be managed under the quality management system.
