The Enigma of a Violent Woman Jennifer M. Kilty, Sylvie Frigon, 2016-04-14 Karla Homolka has proven to be a figure of enduring interest to the public and media for the last 20 years However despite the widespread Canadian and international public commentary and media frenzy that has encircled this case Homolka herself remains an enigma to most who write about her In contrast to much of the contemporary discussion on this case this book offers a comprehensive and detailed examination of the legal public and media understandings and explanations of Homolka's criminality Drawing from multiple fields of study and varied bodies of critical literature the book uses Homolka as an object lesson to interrogate some of the narratives and conceptualizations of violent women the problematic normative constructions of womanhood and acceptable femininity leniency in sentencing taboo and disgust and questions of remorse The authors address broad questions about how women convicted of violence are typically constructed across four sites the courts the academy the mainstream media and public discourse This unique text is extremely important for feminist criminology and socio legal studies offering the first comprehensive academic effort to engage in dialogue about this important and fascinating case

The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society Helen Wells, 2022-03-26 The Fast and The Furious Drivers Speed Cameras and Control in a Risk Society presents a sociological and criminological perspective critical to understanding the driver's role at the centre of road safety interventions Such an approach is it is argued as

crucial to an understanding of attempts to reduce road crashes deaths and injuries as approaching such questions from an engineering or educational perspective The book offers an explanation for the continued debate about one road safety intervention the speed camera by situating that debate within contemporary literature about the risk society Beck 1992 and more broadly understood experiences of risk faced on a daily basis by drivers Rather than a focus on risk as something that can be objectively assessed measured and managed separately from the social context in which it is encountered it suggests that risk is something that permeates this particular debate from every angle The book achieves its aims by utilising sociological and criminological perspectives to investigate issues such as the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness the self defined respectability of the population being problematised and its juxtaposition with a proper police focus on real criminals the reconceptualisation of law breaking as risk taking rather than inherently wrong behaviour and its consequences for the enforcement of laws based on risk assessment the experience of being controlled by technology and of receiving what is essentially automated justice These and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context
