Philosophy Of Guidance Essays:

Essays in Philosophical Synthesis Nicholas Rescher, 2023-09-02 This book presents a series of coordinated studies that explain and illustrate how philosophy must be developed systematically with its problems and topics bound together by links of reciprocal interconnection The book consists of two parts The first part consists of a series of case studies which illustrate how philosophical issues do not remain in neatly separated compartments but reach out in interrelationship with one another The second part analyzes the principle resources of philosophical methodology and shows in detail how and why they can only be implemented in a systemically interrelated manner Overall the book demonstrates and illustrates the systemic and holistic nature of philosophical inquiry *Essays on Some Theological Questions of the Day* Henry Barclay Swete, 1906

An Essay on African Philosophical Thought Kwame Gyekye, 1995 In this sustained and nuanced attempt to define a genuinely African philosophy Kwame Gyekye rejects the idea that an African philosophy consists simply of the work of Africans writing on philosophy It must Gyekye argues arise from African thought itself relate to the culture out of which it grows and provide the possibility of a continuation of a philosophy linked to culture Offering a philosophical clarification and theology and ethics of the Akan of Ghana Gyekye argues that critical analyses of specific traditional African modes of thought are necessary to develop a distinctively African philosophy as well as cultural values in the modern world *The Tree of Knowledge and Other Essays* Wright, 2021-09-20 In an autobiographical introduction the author tells about the two forces which have shaped his intellectual life philosophy as an academic profession and philosophy as a search for a view of life The book accordingly divides in two parts The essays in the first part survey developments in logic and analytical philosophy in the perspective of the closing century and in the light of the author's long experience and participation in them There are also essays on Musil's criticism of Mach on the Finnish philosopher Eino Kaila's search for a monistic world view and on Wittgenstein's place on the cultural map of the century The papers in the second part deal with traits of contemporary civilization which have become problematic thanks to the impact of technological developments on political and social forms of life Humanism modernity and scientific rationality are key ideas taken up for critical scrutiny **Essays on Kant, Schelling, and German Aesthetics** Henry Crabb Robinson, 2010 As a student at the University of Jena at the beginning of the nineteenth century Henry Crabb Robinson 1775 1867 became the outstanding English mediator of the revolution in German thought For the first time this volume collects his early writings both published and unpublished The contents include Letters on the Philosophy of Kant and notes from F W J Schelling's lectures on the philosophy of art Further Robinson's private lectures for Madame de Staël are presented with her marginalia In the intellectual history of Romanticism Robinson emerges as a major figure whose lucid and entertaining essays can still guide the modern reader through the key German texts *Seven Essays on the Genealogy of Uncertainty* Stephen Nash, Liza Rybak, 2024-09-30 Uncertainty is critical to economic theory mainly because it either supports or undermines many significant debates within economic theory Despite

the significance of uncertainty this book represents the first attempt to comprehensively trace the genealogy of uncertainty which is a procedure that Nietzsche used in relation to morality one of the subjects that become logically redundant in the absence of uncertainty On the one hand this logical redundancy is problematic when considered in isolation given the practical importance of morality On the other hand this logical redundancy becomes even more problematic given that at one time uncertainty was widely accepted as an important part of the philosophical system Here uncertainty played a pivotal role in terms of explaining practical decision making Such an appreciation of uncertainty has recently been set aside by modern philosophy which argues quantities of human labour provide virtually all economic value Such an explanation of economic value excludes uncertainty the many qualitative contributions of nature and morality even when one acknowledged the contribution to the understanding of uncertainty as proposed by Frank Knight in 1921 However in contrast to Knight who looked toward recent philosophy so as to support the existence of uncertainty this genealogy looks to support the significance of uncertainty by understanding the philosophy that supported the idea of uncertainty for thousands of years before the philosophy of John Locke Specifically Locke excludes uncertainty from the analysis of practical decision making in general and from economic decision making in particular Accordingly it can be anticipated that the enclosed genealogy will assist economists to more adequately develop the idea of uncertainty within economic theory

The Arc of the Moral Universe and Other Essays Joshua Cohen, 2010 In this collection of essays Joshua Cohen locates ideas about democracy in three far ranging contexts First he explores the relationship between democratic values and history He then discusses democracy in connection with the views of defining political theorists in the democratic tradition John Locke John Rawls Noam Chomsky Juergen Habermas and Susan Moller Okin Finally he examines the place of democratic ideals in a global setting suggesting an idea of global public reason a terrain of political justification in global politics in which shared reason still plays an essential role All the essays are linked by his overarching claim that political philosophy is a practical subject intended to orient and guide conduct in the social world Cohen integrates moral social scientific and historical argument in order to develop this stance and he further confronts the question of whether a society conceived in liberty and dedicated to equality can endure At Gettysburg President Lincoln forcefully stated the question and expressed both hope and concern over this same struggle about an affirmative answer By enabling us to trace the arc of the moral universe the essays in this volume along with the companion collection Philosophy Politics Democracy give us some reasons for sharing that hope
