

1. Which quantity is base quantity?

- A. Potential difference
- B. Electric current
- C. Electric energy
- D. Electric power

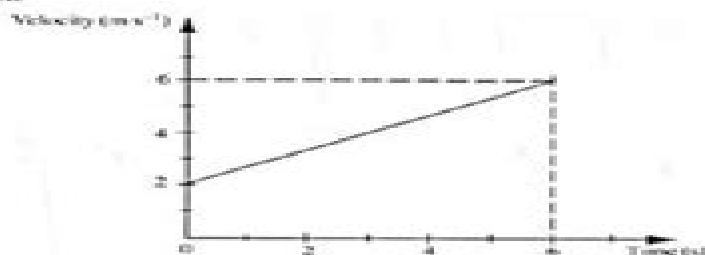

2. Diagram below shows two identical eggs are dropped from same height, h , onto a floor and a sponge respectively.

Which inference is correct?

- A. Impulsive force depends on velocity of egg
- B. Impulsive force depends on time of impact
- C. Impulsive force depends on gravitational force
- D. Impulsive force depends on height of egg

3. Diagram below shows a velocity-time graph for a motion of an object.

What is the displacement of the object?

- A. 12 m
- B. 18 m
- C. 24 m
- D. 36 m

4. The balanced forces that act on the moving object could make the object

- A. decelerates
- B. accelerates
- C. change the direction of motion
- D. moves with constant velocity

5. Diagram below shows a cat chasing a rat.

Base quantity is physical quantity that cannot derive from other physical quantities. Eg to see how physics in a quantitative and can be predicted with physical quantities itself?

Impulsive force is the rate of change of momentum. From the definition here, can you write down the formula of impulsive force?

Unbalanced force means there is some resultant force or net force acting on the object. What is the effect of force?

Displacement is the distance travelled by an object in specific direction. The unit for displacement is meter, m.

Write down formula for gradient and area?

Impulsive force is the rate of change of momentum.

Momentum is the product of mass and velocity.

Pressure is force per unit area.

Impulse is the change of momentum.

Based on above definition, write down the formula for each definition.

What is the effect of force? Balanced force is similar to no force acting on the object.

performance **Regional Risk and Security in Japan** Glenn D. Hook, Ra Mason, Paul O'Shea, 2015-05-20 Japan's unusual position in the realm of international politics encapsulates a three fold juxtaposition both in and out of Asia both occupied by and a close ally of the United States and both a key trade partner and a strategic rival of China Whilst international relations theory offers a number of ways to analyse these relations this book instead utilizes the concept of risk to provide an innovative perspective on Japan's relations with China North Korea and the US The book elucidates how risk potential harm and harm are faced disproportionately by certain groups in society This is demonstrated by providing an empirically rich analysis of the domestic implications of security relations with China North Korea and the United States through the presence of US troops in Okinawa Beginning with a theoretical discussion of risk it goes on to demonstrate how the concept of risk adds value to the study of international relations in three senses First the concept helps to break down the boundaries between the international and domestic Second the focus on risk and the everyday directs us to ask basic questions about the costs and benefits of a security policy meant to secure the national population Third what implications do these two points have for governance The question is one of governance as Japan's externally oriented security policy produces domestic insecurity shared disproportionately not equally as this volume makes clear Developing the theory of risk as a tool for understanding international relations this book will be of great interest to students and scholars of Asian politics Japanese politics international relations and security studies as well as to policy makers and practitioners working in the field *Soil Science in Italy* Carmelo Dazzi, Anna Benedetti, Giuseppe Corti, Edoardo A.
