Large Fluvial Lowlands* Paul F. Hudson,2021-11-25 Pressure on large fluvial lowlands has increased tremendously during the
past twenty years because of flood control urbanization and increased dependence upon floodplains and deltas for food
production This book examines human impacts on lowland rivers and discusses how these changes affect different types of
riverine environments and flood processes Surveying a global range of large rivers it provides a primary focus on the lower
Rhine River in the Netherlands and the Lower Mississippi River in Louisiana A particular focus of the book is on geo
engineering which is described in a straight forward writing style that is accessible to a broad audience of advanced students
researchers and practitioners in global environmental change fluvial geomorphology and sedimentology and flood and water
management *The Water Will Come* Jeff Goodell,2017-10-24 What if Atlantis wasn't a myth but an early precursor to a new
age of great flooding Across the globe scientists and civilians alike are noticing rapidly rising sea levels and higher and
higher tides pushing more water directly into the places we live from our most vibrant historic cities to our last remaining
traditional coastal villages With each crack in the great ice sheets of the Arctic and Antarctica and each tick upwards of
Earth's thermometer we are moving closer to the brink of broad disaster By century's end hundreds of millions of people will
be retreating from the world's shores as our coasts become inundated and our landscapes transformed From island nations
to the world's major cities coastal regions will disappear Engineering projects to hold back the water are bold and may buy
some time Yet despite international efforts and tireless research there is no permanent solution no barriers to erect or walls
to build that will protect us in the end from the drowning of the world as we know it The Water Will Come is the definitive
account of the coming water why and how this will happen and what it will all mean As he travels across twelve countries and
reports from the front lines acclaimed journalist Jeff Goodell employs fact science and first person on the ground journalism
to show vivid scenes from what already is becoming a water world An immersive mildly gonzo and depressingly well timed
book about the drenching effects of global warming and a powerful reminder that we can bury our heads in the sand about

Serial Forms Clare Pettitt,2020-06-04 Serial Forms The Unfinished Project of Modernity 1815 1848 proposes an entirely new way of reading the transition into the modern It is the first book in a series of three which will take the reader up to the

end of the First World War moving from a focus on London to a global perspective Serial Forms sets out the theoretical and historical basis for all three volumes It suggests that as a serial news culture and a stadial historicism developed together between 1815 and 1848 seriality became the dominant form of the nineteenth century Through serial newsprint illustrations performances and shows the past and the contemporary moment enter into public visibility together Serial Forms argues that it is through seriality that the social is represented as increasingly politically urgent The insistent rhythm of the serial reorganizes time recalibrates and rescales the social and will prepare the way for the 1848 revolutions which are the subject of the next book By placing their work back into the messy print and performance culture from which it originally appeared Serial Forms is able to produce new and exciting readings of familiar authors such as Scott Byron Dickens and Gaskell Rather than offering a rarefied intellectual history or chopping up the period into Romantic and Victorian Clare Pettitt tracks the development of communications technologies and their impact on the ways in which time history and virtuality are imagined

Quantization, Coherent States, and Complex Structures J-P Antoine, S.T. Ali, W. Lisiecki, I.M. Mladenov, Anatol Odziejewicz, 2013-06-29 The XIIIth Bialowieza Summer Workshop was held from July 9 to 15 1994 While still within the general framework of Differential Geometric Methods in Physics the XnIth Workshop was expanded in scope to include quantum groups q deformations and non commutative geometry It is expected that lectures on these topics will now become an integral part of future workshops In the more traditional areas lectures were devoted to topics in quantization field theory group representations coherent states complex and Poisson structures the Berry phase graded contractions and some infinite

dimensional systems Those of us who have taken part in the evolution of the workshops over the years feel a good measure of satisfaction with the excellent quality of the papers presented in particular the mathematical rigour and novelty Each year a significant number of new results are presented and future directions of research are discussed Their freshness and immediacy inevitably leads to intense discussions and an exchange of ideas in an informal and physically charming environment The present workshop also had a higher attendance than its predecessors with approximately 65 registered participants As usual there was a large number of graduate students and young researchers among them
