**David S. Moore, George P.
McCabe, Bruce A. Craig**

Physical Science P1 2014 Memorandum Example:

Nuclear Science Abstracts ,1962 *A Geometric Theory for Hypergraph Matching* Peter Keevash, Richard Mycroft,2014-12-20 The authors develop a theory for the existence of perfect matchings in hypergraphs under quite general conditions Informally speaking the obstructions to perfect matchings are geometric and are of two distinct types space barriers from convex geometry and divisibility barriers from arithmetic lattice based constructions To formulate precise results they introduce the setting of simplicial complexes with minimum degree sequences which is a generalisation of the usual minimum degree condition They determine the essentially best possible minimum degree sequence for finding an almost perfect matching Furthermore their main result establishes the stability property under the same degree assumption if there is no perfect matching then there must be a space or divisibility barrier This allows the use of the stability method in proving exact results Besides recovering previous results the authors apply our theory to the solution of two open problems on hypergraph packings the minimum degree threshold for packing tetrahedra in graphs and Fischer s conjecture on a multipartite form of the Hajnal Szemerédi Theorem Here they prove the exact result for tetrahedra and the asymptotic result for Fischer s conjecture since the exact result for the latter is technical they defer it to a subsequent paper Introduction to the Practice of Statistics David S. Moore,George P. McCabe,Bruce A. Craig,2014-02-07 With this updated new edition the market leading Introduction to the Practice of Statistics IPS remains unmatched in its ability to show how statisticians actually work Its focus on data analysis and critical thinking step by step pedagogy and applications in a variety of professions and disciplines make it exceptionally engaging to students learning core statistical ideas
