Van Klooster, 1931 **Laboratory Manual of Physical Chemistry (Classic Reprint)** Albert Watson Davison, 2017-09-16

Excerpt from Laboratory Manual of Physical Chemistry In view of the fact that there are as a rule available for laboratory work not more than two and one half hours at a time it has been found desirable to have the different pieces of apparatus set up beforehand by the instructor To this end each experiment is preceded by an exact list of the appa ratus and chemicals needed It is believed that this will materi ally aid the instructor in assembling the necessary equipment At the Rensselaer Polytechnic Institute the laboratory course immediately follows the completion of the theoretical course in physical chemistry and students are thus prepared to take up the study of any experiment herein listed It is therefore found practical to prepare the equipment for one or two units of each exercise before the laboratory course starts and to shift the student successively from one experiment to another In this way an excessive amount of preparatory work is avoided Many of the experiments have been in use in their present form at this Institute and elsewhere for a number of years and have been found to be thoroughly satisfactory About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Hooked on Pchem Lab Robb J.
