Plants and Snails Gizmo

Overview

You will study the production and use of gases by plants and animals by measuring the oxygen (O_2) and carbon dioxide (CO_2) levels in a test tube containing snails and elodea (a type of plant) in both light and dark conditions.

Prior Knowledge Questions

Question/Prompt	Your Response
1. What important gas do we take in when we breathe?	Oxygen.
2. Why don't we run out of the important gases that we need to stay alive?	We breathe oxygen in and out of our bodies.

Directions

Part A: Introduction

1. Open a new tab or window. Go to the [Plants and Snails Gizmo](#).
2. In the Gizmo, each of the test tubes contains water and a small amount of **bromothymol blue (BTB)**. BTB is a chemical indicator. An indicator changes color when the chemicals in the water change.

Question/Prompt	Your Response
With the lights set to on, drag a snail into one test tube and a plant into another. Press Play ().	The snail tube turned yellow and the plant tube turned blue.
3. After 24 hours, what is the color of each tube?	
Select Show O_2 and CO_2 values in the lower left hand corner of the screen. Place the O_2/CO_2 probe in the first tube then move it to the second tube. The probe shows the levels of two gases, O_2 and CO_2 , in the tubes. We call these amounts the <i>gas levels</i> .	
4. When the water turns blue, which gas is most common?	Oxygen
5. When the water turns yellow, which gas is most common?	Carbon Dioxide
6. What does it tell you when the water is green?	Both oxygen and carbon dioxide levels are even (6.0)
7. Describe the carbon dioxide-oxygen cycle by completing the sentences:	Animals breathe in [oxygen] and breathe out [carbon dioxide].

www.tangfiu.edu **Challenging Science Standards** Charles R. Ault Jr., 2015-08-06 For several decades educators have struggled to identify the attributes all sciences have in common. In the popular mind this effort constitutes the importance of teaching the scientific method. In the policy maker's world this pursuit yields standards for all Americans that unify the sciences. For teachers the quest for unity has typically meant teaching science as process. However a curriculum that prioritizes what all sciences have in common obscures their vital differences. For example studying landslides is very different from doing x ray diffraction. Climate science is unlike medical research. Naïve ideas about scientific unity impoverish the public's ability to evaluate scientific enterprises. **Challenging Science Standards** voices skepticism towards the quest for unity. Through analyses of disciplinary knowledge, school curricula and classroom learning the book uncovers flaws in the unifying dimensions of the science standards. It proposes respect for disciplinary diversity and attention to questions of value in choosing what science to teach. Illuminated by vignettes of children and adolescents studying topics ranging from snail populations to horse fossils **Challenging Science Standards** proposes promising remedies.

Plants and Vegetation Paul Keddy, 2007-06-07 Plants make up 99.9 percent of the world's living matter, provide food and shelter and control the Earth's climate. The study of plant ecology is therefore essential to understanding the biological functions and processes of the biosphere. This vibrant introductory textbook integrates important classical themes with recent ideas, models and data. The book begins with the origin of plants and their role in creating the biosphere as the context for discussing plant functional types and evolutionary patterns. The coverage continues logically through the exploration of causation with chapters, amongst others, on resources, stress, competition, predation and mutualism. The book concludes with a chapter on conservation addressing the concern that as many as one third of all plant species are at risk of extinction. Each chapter is enriched with striking and unusual examples of plants, e.g. stone plants, carnivorous plants and plant habitats, e.g.

isolated tropical tepui arctic cliffs Paul Keddy writes in a lively and thought provoking style which will appeal to students at all levels
