Design information / Scenario

Last weekend, there was an accident just outside town. A car lost control, went off the road and toppled over. Two people were trapped inside the crashed car. They were badly injured, but still alive. Because the metal body of the car was bent, the doors could not open. Emergency workers used a "Jaws of Life" system to cut the vehicle open to free the two people.

You need to design and build the following system:

1. "Jaws of Life" system using pneumatics or hydraulics to obtain a mechanical advantage.
2. The device represents how anyone machine in the system will work using materials, such as plastic tubing, syringes (without needles) and cardboard or ice-cream sticks and split pins.
3. Write a design brief, specifications, and constraints/ limitations.
4. Draw a 3D drawing of the idea in oblique (orthographic sketch) projection dark and faint lines
5. Draw a work drawing in 2D showing one view with dimensions to scale.
