DEFINITIONS AND MEANING

Sociology is the scientific study of man's behaviour in relation to other groups and individuals with whom he interacts or the scientific study of human social life, groups and societies.¹ Similarly, La Vern defined as the study of human society and social behaviour.² However, Giddens defined sociology as the systematic study of human societies, giving special emphasis to modern and industrialized systems besides being a social science that concerns itself with understanding of human behaviour. The three social scientists have all recognised that sociology is a science. Science is the use of systematic methods of empirical investigation, the analysis of data, theoretical thinking and logical assessment of arguments to develop a body of knowledge about a particular theme.³ Similarly, Macionis defined science as a logical system that bases knowledge on systematic observation. Giddens definition of science endorsed sociology as a scientific endeavour for the reason that it engages systematic methods of empirical investigations, analysis of data and assessment of theories in the light of evidence and logical arguments. Sociology is one of the social sciences including economics, human geography and psychology that in the process of study attempts to explain and understand the behaviour of human beings in society. Sociological Theory in Use (RLE Social Theory) Kenneth Menzies, 2014-08-21 Central to most sociologists self image is the claim that their theories are based on research However using a random sample of 680 articles appearing in major American British and Canadian journals Dr Menzies shows that in some areas of sociology the wide gap between theory and research means that much of sociological theory is virtually untested He explains how theory is embodied in eight particular types of research critically examines these research theories and contrasts them with the positions of modern theorists The sample of journal articles also permits a comparison of British American and Canadian sociology By contrasting on how researchers use theories Dr Menzies is able to reassess several theories For instance symbolic interactionist research uses embedded causal claims and stands in a dialectical relationship to other sociological research while the research version of conflict theory depends on external causes to explain social change The implications of using statistical techniques like factor analysis and regression are also considered in relation to the form of explanation Explorations in Social Theory George Ritzer, 2001-04-10 George Ritzer is one of the leading social and cultural commentators of the present day In this essential new book he considers some of the main tendencies in contemporary social theory Included here are Ritzer's latest reflections on the uses and misuses of metatheory According to Ritzer sociology is a multiparadigm science The differences and intensities of rivalries between paradigms are often very confusing for students and even for professional sociologists This book seeks to find a way out of the confusion by sketching out the lineaments of a new integrated sociological paradigm and demonstrates how this paradigm can be applied It shows the various ways in which Ritzer has developed rationalization theory to shed light on professional integration the shape of consumer culture hyperrationality and the state of sociology today Handbook of Sports Studies Jay Coakley, Eric Dunning, 2000 An authoritative cast of international and interdisciplinary contributors present the best of current thinking in sports studies as the subject matures and develops academically **Social Research Methods** Kristin Kenneavy, Catherine E.
