Making Sense of Messages Mark Stoner, Sally J. Perkins, 2015-10-16 Using a developmental approach to the process of criticism *Making Sense of Messages* serves as an introduction to rhetorical criticism for communication majors. The text employs models of criticism to offer pointed and reflective commentary on the thinking process used to apply theory to a message. This developmental apprenticeship approach helps students understand the thinking process behind critical analysis and aids in critical writing.

Dark Web Hsinchun Chen, 2011-12-16 The University of Arizona Artificial Intelligence Lab AI Lab Dark Web project is a long term scientific research program that aims to study and understand the international terrorism Jihadist phenomena via a computational data centric approach. We aim to collect ALL web content generated by international terrorist groups including web sites, forums, chat rooms, blogs, social networking sites, videos, virtual world, etc. We have developed various multilingual data mining, text mining, and web mining techniques to perform link analysis, content analysis, web metrics, technical sophistication analysis, sentiment analysis, authorship analysis, and video analysis in our research. The approaches and methods developed in this project contribute to advancing the field of Intelligence and Security Informatics (ISI). Such advances will help related stakeholders to perform terrorism research and facilitate international security and peace. This monograph aims to provide an overview of the Dark Web landscape, suggest a systematic computational approach to understanding the problems, and illustrate with selected techniques, methods, and case studies developed by the University of Arizona AI Lab Dark Web team members. This work aims to provide an interdisciplinary and understandable monograph about Dark Web research along three dimensions: methodological issues in Dark Web research, database and computational techniques to support information collection and data mining, and legal, social, privacy, and data confidentiality challenges and approaches. It will bring useful knowledge to scientists, security professionals, counterterrorism experts, and policy makers. The monograph can also serve as a reference material or textbook in graduate level courses related to information security, information policy, information assurance, information systems, terrorism, and public policy.
