

USING APA STYLE IN AN ACADEMIC PAPER

The *American Psychological Association* has created a guide that is used by academics and students in several disciplines, including education. This style guide, called the *Publication Manual of the American Psychological Association*, outlines many conventions that a writer needs to use (including how to reduce bias, which words should be capitalized and which should be lowercased, and how to format research results in tables and figures). There are other style guides for other academic disciplines, but APA style is the standard in education.

All university libraries will have a reference copy of the *Publication Manual of the American Psychological Association* (6th edition). You might decide to buy a copy of it for yourself (especially if you're a graduate student or if you're planning to pursue graduate studies). However, the OWL at Purdue University is also a great source of information about APA style conventions and it's free. <http://owl.english.purdue.edu/owl/resource/560/05/>

So, what can APA do for you? Well, recall that when you're writing a paper, you're sharing your original thesis with your professor and your peers, and proving that it's true by relying on scholars' research. By using APA style conventions correctly and consistently, you ensure that you're

- using writing conventions that are standard in your profession and so you're identifying yourself as a member of that profession.
- writing with integrity and giving credit where credit is due.

USING OTHERS' WORK IN YOUR WRITING

According to APA style, there are two ways to communicate to your reader that you've used others' work:

- In your text, you need to show that you've paraphrased or directly quoted someone else.
- At the very end of your paper, you need to provide a list of all the articles, chapters, books, and websites that you've used within the body of your text.

IN-TEXT CITATIONS

PARAPHRASING SOMEONE ELSE

When you paraphrase someone else, you're putting someone else's work in your own words. To make that happen, you need to select only the most important information and do one or both of the following:

- completely change the original wording.
- completely change the order of the ideas and words.
