that installation only be carried out by qualified personnel according to hazardous area safe working practice and in conformity to the terms of the product certification. Note that the Translator interface to which this device will be linked does not form part of the ATEX/IECEx certified system and must be sited in the safe area which is not subject to hazardous conditions.

### GENERAL DESCRIPTION

The intrinsically safe wireless multi-criteria detector samples the air to determine an alarm conditions in the protected environment. Its design and construction makes it suitable for installation in hazardous environment according to ATEX DIRECTIVE 2014/34/EU. System design should follow National Regulations or Codes of Practice including reference to standards related to hazardous areas (e.g. EN 60079-14:2014) as appropriate. These detection devices are designed for indoor applications and care should be taken to ensure the environmental conditions are suited to the device type so that unwanted alarm conditions are prevented.

### DETECTOR VISUAL LED INDICATOR

The wireless multi-criteria detector is equipped with a LED that provides visual indication for functional modes, battery faults and other fault types ( see table 1).

### LINKING THE DEVICE TO THE SYSTEM

This detector must be linked to the fire detection system before installation; specifically it must be linked to its translator or expander interface following the system design plan.

**NOTE:** As a safety precaution linking and power up of devices should be carried out adjacent to the translator/expander interface in the safe area.

For more detailed information about wireless linking refer to "Guide to wireless system installation" document (APN-W0001) or refer to your system supplier.

This manual gives the specific linking procedure applicable only to this detector.
