The Politics of Fracking Sarmistha R. Majumdar, 2018-08-29 Over the last decade the oil and gas industry has garnered a lot of support from the United States federal and state governments in the name of energy independence and economic prosperity More specifically hydraulic fracturing or fracking is said to not only make the production of affordable energy possible but also reduce emissions of carbon dioxide by substituting coal with natural gas in the utility sector Behind the façade of many socio economic and political benefits the process of fracking causes serious environmental concerns Dismissing the negative externalities of fracking simply raises the question to what extent have communities close to fracking sites been adversely impacted by it In this book Sarmistha R Majumdar studies four communities close to fracking well sites in Texas to help illustrate to what extent fracking regulations have been developed in Texas and how effective these regulations have been in safeguarding the interests of individuals in local communities amidst the lure of economic gains from the extraction of oil and natural gas from shale formations Majumdar has developed a model to show stage by stage community actions to regain their quality of life and the consequences of their actions if any on state

and local regulations and ordinances and the oil and gas industry This book will be an important resource for scholars of environmental and natural resource politics and policy in the United States *Middle East and North Africa Economic Monitor, October 2016* Devarajan, Shantayanan ,Mottaghi, Lili ,2016-08-23 The year 2016 appears to be one of the toughest for the Middle East and North Africa MENA region as their governments face serious policy challenges The biggest challenge for oil exporters is managing their finances and diversification strategies with oil below 45 a barrel Fiscal consolidation in a difficult sociopolitical environment and spillovers from conflicts are creating challenges for oil importers as well Real GDP growth in MENA for 2016 is projected to fall to its lowest level since 2013 2 3 percent lower than last year s growth by half a percentage point and about one percentage point lower than predicted in April 2016 It is clear that the disappointing performance of the MENA economies and possibly the global economy is partly due to the rise of terrorist attacks and spread of violent extremism In this report we attempt to shed light on the underlying causes of this phenomenon by applying an economic perspective to the demand for and supply of violent extremists Looking at a dataset on foreign fighters joining Daesh we find that the factors most strongly associated with foreign individuals joining Daesh have to do with a lack of inclusion economic social and religious in their country of origin Promoting greater inclusion therefore could not only bring down the level of violent extremism but it could improve economic performance in the MENA region **Environmental Considerations Associated with Hydraulic Fracturing Operations** James A. Jacobs,Stephen M. Testa,2019-04-05 A guide to environmental and communication issues related to fracking and the best approach to protect communities Environmental Considerations Associated with Hydraulic Fracturing Operations offers a much needed resource that explores the complex challenges of fracking by providing an understanding of the environmental and communication issues that are inherent with hydraulic fracturing The book balances the current scientific knowledge with the uncertainty and risks associated with hydraulic fracking In addition the authors offer targeted approaches for helping to keep communities safe The authors include an overview of the historical development of hydraulic fracturing and the technology currently employed The book also explores the risk prevention and mitigation factors that are associated with fracturing The authors also include legal cases regulatory issues and data on the cost of recovery The volume presents audit checklists for gathering critical information and documentation to support the reliability of the current environmental conditions related to fracking operations and the impact fracking can have on a community This vital resource Contains the technical information and mitigation recommendations for safety and environmental issues related to hydraulic fracturing Offers an historical overview of conventional and unconventional oil and gas drilling Explains the geologic and technical issues associated with fracking of tight sand and shale formulations Presents numerous case studies from the United States EPA and other agencies Discusses issues of co produced waste water and induced seismicity from the injection of wastewater Written for environmental scientists geologists engineers regulators city planners attorneys foresters wildlife biologists and others Environmental

Considerations Associated with Hydraulic Fracturing Operations offers a comprehensive resource to the complex environmental and communication issues related to fracking

Historic Real Estate Whitney Martinko, 2020-05-15 A detailed study of early historical preservation efforts between the 1780s and the 1850s In *Historic Real Estate* Whitney Martinko shows how Americans in the fledgling United States pointed to evidence of the past in the world around them and debated whether and how to preserve historic structures as permanent features of the new nation s landscape From Indigenous mounds in the Ohio Valley to Independence Hall in Philadelphia from Benjamin Franklin s childhood home in Boston to St Philip s Episcopal Church in Charleston South Carolina from Dutch colonial manors of the Hudson Valley to Henry Clay s Kentucky estate early advocates of preservation strove not only to place boundaries on competitive real estate markets but also to determine what should not be for sale how consumers should behave and how certain types of labor should be valued Before historic preservation existed as we know it today many Americans articulated eclectic and sometimes contradictory definitions of architectural preservation to work out practical strategies for defining the relationship between public good and private profit In arguing for the preservation of houses of worship and Indigenous earthworks for example some invoked the public interest of their stewards to strengthen corporate control of these collective spaces Meanwhile businessmen and political partisans adopted preservation of commercial sites to create opportunities for and limits on individual profit in a growing marketplace of goods And owners of old houses and ancestral estates developed methods of preservation to reconcile competing demands for the seclusion of and access to American homes to shape the ways that capitalism affected family economies In these ways individuals harnessed preservation to garner political economic

and social profit from the performance of public service Ultimately Martinko argues by portraying the problems of the real estate market as social rather than economic advocates of preservation affirmed a capitalist system of land development by promising to make it moral

The Trumping of America Pamela Hines, 2018-08 Trump alone is not to blame How does it reflect on North American societal values when wealth trumps humanity selfish individualism trumps compassion the need to be entertained and to win trumps the truth and racism and misogyny are rewarded with the most powerful position in the world The political rise of Donald Trump from the cutthroat Republican primary process to his move to the White House has ushered in a new age of politics in the United States This is a comprehensive analysis of the events surrounding the 2016 presidential election and the unprecedented first year of Donald Trump's presidency Pamela Hines highlights the growing distortion of American democracy which threatens political systems around the world As a Canadian living just across the border Hines provides a unique perspective on the international impact of the election explores the roles of religion racism nationalism and gender bias and critiques the media and its reckless coverage of Trump's ascension The Trump presidency is a wake up call to citizens of the free world Democracy is at risk yet power remains in the hands of the people This assault on democracy can be curtailed only if voters make informed decisions and understand the consequences of their choices while they still have the right to choose

North American Regionalism Eric Hershberg, Tom Long, 2025-02-01 North American Regionalism problematizes North America as an important region in its own right breaking with the area studies convention that divides the Global North and Global South portions of the Western Hemisphere at the US Mexican border By cutting across this division the theoretically sophisticated essays in this volume yield new insights about politics society and the economy of North America opening dialogues with the New Regionalism approach and the literature on comparative regional studies Drawing on a six year interdisciplinary collaboration among leading scholars from Canadian Mexican US and European universities the book brings North America back into International Relations study of regions and regionalism The book includes robust theoretical and empirical engagement with issues of trade migration security energy and climate and

the rise of China The Gentrification of the Internet Jessa Lingel, 2023-02-07 How we lost control of the internet and how to win it back The internet has become a battleground Although it was unlikely to live up to the hype and hopes of the 1990s only the most skeptical cynics could have predicted the World Wide Web as we know it today commercial isolating and full of even fueled by bias This was not inevitable The Gentrification of the Internet argues that much like our cities the internet has become gentrified dominated by the interests of business and capital rather than the interests of the people who use it Jessa Lingel uses the politics and debates of gentrification to diagnose the massive systemic problems blighting our contemporary internet erosions of privacy and individual ownership small businesses wiped out by wealthy corporations the ubiquitous paywall But there are still steps we can take to reclaim the heady possibilities of the early internet Lingel outlines actions that internet activists and everyday users can take to defend and secure more protections for the individual and to carve out more spaces of freedom for the people not businesses online Directory of Corporate Counsel, Spring 2024 Edition ,
