The Cumulative Book Index , 1998 A world list of books in the English language

Complexity in Economic and Social Systems Stanisław Drożdż, Jarosław Kwapień, Paweł Oświecimka, 2021-05-11 There is no term that better describes the essential features of human society than complexity On various levels from the decision making processes of individuals through to the interactions between individuals leading to the spontaneous formation of groups and social hierarchies up to the collective herding processes that reshape whole societies all these features share the property of irreducibility i.e. they require a holistic multi level approach formed by researchers from different disciplines This Special Issue aims to collect research studies that by exploiting the latest advances in physics economics complex networks and data science make a step towards understanding these economic and social systems The majority of submissions are devoted to financial market analysis and modeling including the stock and cryptocurrency markets in the COVID 19 pandemic systemic risk quantification and control wealth condensation the

innovation related performance of companies and more Looking more at societies there are papers that deal with regional development land speculation and the fake news fighting strategies the issues which are of central interest in contemporary society On top of this one of the contributions proposes a new improved complexity measure **Building the Skyline** Jason M. Barr, 2016 The Manhattan skyline is one of the great wonders of the modern world But how and why did it form Much has been written about the city's architecture and its general history but little work has explored the economic forces that created the skyline This book chronicles the economic history of the Manhattan skyline In the process the book debunks some widely held misconceptions about the city's history Part I lays out the historical and environmental background that established Manhattan's real estate trajectory before the Skyscraper Revolution at the end of the 19th century The book begins with Manhattan's natural and geological history and then moves on to how it influenced early land use and neighborhood formation and how these early decisions eventually impacted the location of skyscrapers Part II focuses specifically on the economic history of skyscrapers and the skyline investigating the reasons for their heights frequencies locations and shapes The book discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown but not in between Contrary to popular belief it was not due to the depths of Manhattan's bedrock nor the presence of Grand Central Station Rather midtown's emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War The book also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties Contrary to conventional wisdom the boom was largely a rational response to the economic growth of the nation and city The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices Finally an Epilogue offers policy recommendations for a resilient and robust future skyline *Iceland* International Monetary Fund, International Monetary Fund. Monetary and Capital Markets Department, 2023-07-28 Macroprudential policy in Iceland recently has centered on the property market given the importance of this market for households balance sheets banks loan portfolios and the potential systemic risks The authorities have proactively used property related macroprudential tools to safeguard the stability of the financial system and to ensure financial prudence among borrowers The Central Bank of Iceland CBI is the authority with the macroprudential policy mandate *Regulation and Governance of Mutual Funds* Mohammed Khair Alshaleel, 2022-08-12 This book provides a detailed analysis of mutual fund regulations and governance in the UK from the investor protection perspective It comprehensively describes mutual funds by their function social utility and legal attributes examining the level of protection provided to retail investors under existing regulations Mutual funds are externally managed with fund ownership separated out from their management which carries a potential conflict of interest between the self interests of the fund management and each fund's investors The book provides an in depth analysis of this agency problem in the mutual fund industry comparing the competing governance models in the UK and the US and the supervision of management activities In the UK it

investigates the main governance mechanisms including disclosure the effectiveness of voting rights and the role of the Financial Conduct Authority in protecting investors It also considers the role of prudential regulations in protecting mutual fund investors with a particular focus on risk management and mutual fund liquidity crisis The book further investigates the impact of the withdrawal of the UK from the European Union Brexit on the industry and what this means for the future of the undertakings for collective investment in transferable securities UCITS in the UK The concept of mutual funds is still not clearly understood so this book will clearly define the different legal and practical aspects of mutual funds It will be the first substantial study of mutual fund governance mechanisms under the existing mutual fund laws and regulations in the UK

The Evolution of Great World Cities Christopher Kennedy, 2011-01-01 Some cities seem destined to become major financial capitals yet never do Seville for instance was the centre of Spain's opulent New World Empire but failed to become a financial metropolis Others like former colonial backwater Hong Kong defy the odds by growing into major trading centres What are the key factors distinguishing those cities that become wealthy from those that don't Christopher Kennedy illuminates how geography technology and especially the infrastructure of urban economies allow cities to develop and thrive The Evolution of Great World Cities unfolds through the tales of several urban centres including Venice Amsterdam London and New York City at key junctures in their histories Kennedy weaves together significant insights from urbanists such as Jane Jacobs and economists such as John Maynard Keynes drawing striking parallels between the functioning of ecosystems and of wealthy capitals The Evolution of Great World Cities offers an accessible introduction to urban economies that will change the way you think about cities

Quantum-Like Models for Information Retrieval and Decision-Making

Diederik Aerts, Andrei Khrennikov, Massimo Melucci, Bourama Toni, 2019-09-09 Recent years have been characterized by tremendous advances in quantum information and communication both theoretically and experimentally In addition mathematical methods of quantum information and quantum probability have begun spreading to other areas of research beyond physics One exciting new possibility involves applying these methods to information science and computer science without direct relation to the problems of creation of quantum computers The aim of this Special Volume is to encourage scientists especially the new generation master and PhD students working in computer science and related mathematical fields to explore novel possibilities based on the mathematical formalisms of quantum information and probability The contributing authors who hail from various countries combine extensive quantum methods expertise with real world experience in application of these methods to computer science The problems considered chiefly concern quantum information probability based modeling in the following areas information foraging interactive quantum information access deep convolutional neural networks decision making quantum dynamics open quantum systems and theory of contextual probability The book offers young scientists students PhD postdocs an essential introduction to applying the mathematical apparatus of quantum theory to computer science information retrieval and information processes Publishers Weekly

,1959 **The Problematic Structure of Management of Co-Owned Properties in Turkish Law and Pursuance of Solutions** Eylem Apaydin,2011-01-18 This book provides a critical evaluation of the statutory framework for co ownership regulations in Turkish law and it acquaints Turkish jurists with the existence of trust of land in English law It is posited upon the argument that solutions to the problems observed in the administration and enjoyment of co owned properties in Turkish law may be overcome by the introduction of a new institution which is inspired by the trust mechanism in English law This renders the existing Turkish regulation for the management of the co owned properties outdated unreasonably complex and extremely artificial with some assumptions After successfully establishing that the Turkish system is currently inadequate to provide an efficient system this book provides the indications for a solution Being aware of the limitations of the Turkish legal system and the restricted possibility of the direct reception of trust this book examines to what extent the current institutions in Turkish law would replace the functions of trust in the context of co ownership This examination results in searching for a new system as it is concluded that any of the trust like devices in the current Turkish law could not effectively and comprehensively serve the purposes that the English trust does Therefore this book suggests that a new mechanism inspired by the English trust of land would provide the required mechanisms for an efficient managerial system for co owned properties Rather than asserting to solely focus on a comprehensive new system this book discusses the possible solutions and urges further research about the matter Hence the so called alien system trust of land and its capability to provide an alternative but efficient and productive solution to the managerial problems of the co owned properties would be made familiar with the Turkish jurists *Books in Print Supplement* ,2002 *Theory and Applications of Models of Computation* Mitsunori Ogiwara,Jun Tarui,2011-04-27 This book constitutes the refereed proceedings of the 8th International Conference on Theory and Applications of Models of Computation TAMC 2011 held in Tokyo Japan in May 2011 The 51 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from 136 submissions The papers address the three main themes of the conference which were computability complexity and algorithms and are organized in topical sections on general algorithms approximation graph algorithms complexity optimization circuit complexity data structures logic and formal language theory games and learning theory and cryptography and communication complexity **The Publishers Weekly** ,1959 **REAL ESTATE FUNDAMENTALS, 9TH EDITION.** Wade E. Gaddy,2015 **Subject Guide to Books in Print** ,1997

Enjoying the Tune of Appearance: An Emotional Symphony within **Real Estate Fundamentals 8th Edition 2011**

In a world consumed by screens and the ceaseless chatter of quick transmission, the melodic splendor and emotional symphony created by the prepared term usually disappear into the background, eclipsed by the relentless sound and interruptions that permeate our lives. Nevertheless, situated within the pages of **Real Estate Fundamentals 8th Edition 2011** a marvelous fictional value full of fresh emotions, lies an immersive symphony waiting to be embraced. Crafted by a wonderful composer of language, that fascinating masterpiece conducts viewers on an emotional trip, well unraveling the concealed melodies and profound affect resonating within each carefully constructed phrase. Within the depths of this emotional evaluation, we shall discover the book is central harmonies, analyze their enthralling writing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
