The Report: Indonesia 2018 Oliver Cornock,2018 In 2018 the Indonesian economy recorded a growth rate of 5.2% the highest in five years This was in spite of a slump in the rupiah and a trade imbalance and took place against a backdrop of rising US interest rates and deteriorating trade relations between the world's two biggest economies The country's emphasis on industrialisation and infrastructure development is laying the foundations for continued economic growth Moreover the archipelago's growing middle class population geographical position and human capital development agenda alongside progress in free trade agreements make it a strong contender on the global economic stage The country holds considerable potential for developing entrepreneurial and creative prowess already being home to four unicorn startups Investors have continued to look beyond traditional destinations with emerging cities like Surabaya and Palembang showing strong possibilities for economic growth Although the outcome of the April 2019 national election will determine the course of further infrastructure development and tax reforms the future looks promising with predictions of continued growth accompanied by stable inflation Secretary's Annual Report to Congress United States. Corporate Control of White-Collar Crime Petter Gottschalk,2022-09-20 Traditionally corporate control is all about top down approaches to management of employees Executives attempt to influence employees toward achieving business goals and they attempt to prevent and detect wrongdoing misconduct and crime among employees However top down approaches to corporate control do not work when executives and other privileged individuals in the business themselves commit and conceal their wrongdoing misconduct and crime in organizational settings Then there is a need for a bottom up approach in corporate control as outlined in this book Bottom up control refers to the manner in which organizational members can use different types of control mechanisms such as whistleblowing transparency resource access or culture to monitor measure and evaluate executives avoidance of deviant behaviors and influence them toward achieving the organization's goals in efficient and effective ways The newly emerging perspective of a social license to operate forms part of the bottom up strategy where criminalization becomes social property independent of the criminal justice system The social license is predominantly centered on social permission for business activity where the media social movements and citizen watchdogs exert pressure demand change and bring top management to account This book presents a novel approach to corporate control of white collar crime based on the theory of convenience White collar crime is financial crime committed by privileged individuals who have legitimate access to resources based on the power and trust inherent through their professional positions Convenience theory proposes that motive opportunity and willingness are the three dimensions that underlie white collar crime in an organizational context This book contributes to the study of white collar criminality through

a blend of theoretical discussions and practical materials that illuminate and support the use of convenience theory The book discusses how bottom up approaches can overcome the difficulty of detecting white collar crime and overcome the barriers of preventing executive deviance **Report** ,1965 **Overseas Business Reports** ,1993 Hearings, Reports and Prints of the House Select Committee on Small Business United States.
