Daily Graphic Ransford Tetteh, 2014-09-10 Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data-based Methods Faming Huang, Jinsong Huang, Wei Chen, Jinquan Liu, 2022-10-07 Prosecuting International Crimes: A Multidisciplinary Approach Bartłomiej Krzan, 2016-07-11

The volume edited by Bartłomiej Krzan offers different perspectives on the prosecution of international crimes. The analyses contained therein reflect different backgrounds, mainly legal, combining several disciplines and making it a multidisciplinary study. The main but definitely not the exclusive point of reference is that of international law. In addition, other perspectives, those of legal history or sociology of law, and obviously the one of criminal law, both substantive and procedural, provide useful alternatives or, in most occasions, complementary approaches to the examination of the prosecution of international crimes. The book combines different views, backgrounds, and underlying assumptions. But gathered together, they shed some additional useful light that might be helpful for identifying new dimensions of the reaction, judicial or other, towards international crimes.

Cyclones in Southern Africa Godwell Nhamo, Kaitano Dube, 2021-07-24

The subject of tropical cyclones in Southern Africa, also known as hurricanes or typhoons in other regions of the world, has been growing over the past few decades. However, there is still limited literature on foundational and fundamental topics on the matter. To this end, this book addresses this gap, citing some examples from both historic and recent tropical cyclones. The book presents meteorological and climatic aspects of tropical cyclones, including reviews on forecasting, warning, message dissemination, and public response aspects of early warning systems, with a focus on the Tropical Cyclones Idai and Kenneth Fundamentals in disaster risk reduction. DRR are also discussed, moving from the provisions of the Hyogo Framework for Action 2005-2015 to the Sendai Framework for Disaster Risk Reduction 2015-2030. Climate change issues are central to the publication, as well as the role of information and communication technologies in DRR and management. The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR. The book comes as part of a series with three volumes. The other volumes include *Cyclones in Southern Africa Vol 1: Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe* and *Cyclones in Southern Africa Vol 3: Implications for the Sustainable Development Goals*. To this end, this book is suitable as a read for several professionals and disciplines, such as tourism and hospitality studies, economics, sustainable development studies, environmental sciences, arts, geography, life sciences, politics, planning, and public health.
