

Research Paper in APA format:

- A research paper (especially one that requires APA style) is different than a term paper, a creative writing paper, a composition-style paper, or a thought paper.
- A research paper requires you to leave out any personal information (both as content or in your writing style – see below) and to focus on research findings that have been put forth previously (the Intro section), that you have looked at and how (the Purpose (hypothesis), and Method section), and what your findings were (the Results and Discussion section).
- Research papers although generally similar may have different requirements depending on the course (and more specifically the instructor). This is not meant to confuse or frustrate students, rather it comes out of the requirements for publication that vary among fields (e.g., the type of information and the way it is presented has different requirements for behavioral journals than for social psychology journals). Best advice is to follow your instructor's guidelines!
- APA style, although similar, may change over the course of time – information such as how to write the reference section has been changed from edition to edition in the APA Publication Manual

General Tips on Writing Style:

- Impersonal style – as a guideline minimize using first person (e.g., “this study was conducted...” rather than “we conducted this study...”) although there are exceptions; see the APA Publication Manual for any questions about this
- Do not include any personal statements or anecdotes (e.g., “I was interested in studying eating disorders because my sister was diagnosed with...” does not belong in a research paper!)
- Verb tense – as a guideline use past tense (e.g., “the results indicated” rather than “the results indicate”) although there are exceptions; see the APA Publication Manual for any questions about this
- Contractions – do not use contractions! (e.g., “it does not follow” rather than “it doesn't follow”)
- Biased language– keep up to date with appropriate terms, especially if you are writing a paper that involves gender, race, ethnicity, sexual orientation, etc. The APA Manual includes information about terms that are deemed appropriate for use in research papers
- Citations – be sure to cite your sources. Try to paraphrase as much as possible (as opposed to quoting)...a couple of ways to do this:

Dewey Bellow Strauss Friedman The University of Chicago has been the home of some of the most important thinkers of the modern age But perhaps no name has been spoken with more respect than Turabian The dissertation secretary at Chicago for decades Kate Turabian literally wrote the book on the successful completion and submission of the student paper Her Manual for Writers of Research Papers Theses and Dissertations created from her years of experience with research projects across all fields has sold more than seven million copies since it was first published in 1937 Now with this seventh edition Turabian s Manual has undergone its most extensive revision ensuring that it will remain the most valuable handbook for writers at every level from first year undergraduates to dissertation writers apprehensively submitting final manuscripts to senior scholars who may be old hands at research and writing but less familiar with new media citation styles Gregory G Colomb Joseph M Williams and the late Wayne C Booth the gifted team behind The Craft of Research and the University of Chicago Press Editorial Staff combined their wide ranging expertise to remake this classic resource They preserve Turabian s clear and practical advice while fully embracing the new modes of research writing and source citation brought about by the age of the Internet Booth Colomb and Williams significantly expand the scope of previous editions by creating a guide generous in length and tone to the art of research and writing Growing out of the authors best selling Craft of Research this new section provides students with an overview of every step of the research and writing process from formulating the right questions to reading critically to building arguments and revising drafts This leads naturally to the second part of the Manual for Writers which offers an authoritative overview of citation practices in scholarly writing as well as detailed information on the two main citation styles notes bibliography and author date This section has been fully revised to reflect the recommendations of the fifteenth edition of The Chicago Manual of Style and to present an expanded array of source types and updated examples including guidance on citing electronic sources The final section of the book treats issues of style the details that go into making a strong paper Here writers will find advice on a wide range of topics including punctuation table formatting and use of quotations The appendix draws together everything writers need to know about formatting research papers theses and dissertations and preparing them for submission This material has been thoroughly vetted by dissertation

officials at colleges and universities across the country This seventh edition of Turabian's Manual for Writers of Research Papers Theses and Dissertations is a classic reference revised for a new age It is tailored to a new generation of writers using tools its original author could not have imagined while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian *Essentials of Modern Language Association Style* Joseph F. Trimmer, 1998 Summarizes the documentation style of the Modern Language Association of America as it pertains to writing research papers providing information on how to prepare a bibliography how to document sources within the text of a paper when and how to use footnotes and endnotes and how to avoid plagiarizing Bud's Easy Research Paper Computer Manual Alvin Baron, 2015-09-04 How to Book on Writing Research Papers for High School and College Keywords Research Paper Writing Thesis Bibliography Search First Draft Term Papers MLA APA Turabian Language Grammar **Writing Human Factors Research Papers** Don Harris, 2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed **The Psychology Research Handbook** Frederick T. L. Leong, James T. Austin, 2006 This research guide includes practical instructions for graduate students and research assistants on the process of research planning and design data collection and analysis and the writing of results It also features chapters co written by advanced research students providing real world examples
