be made less attractive to thieves Consequently many of today s security products contain not only malware protection but also highly developed theft protection functions which make the device less attractive to thieves e g by locking the device and help the owner to find it again

*Metaverse Land of Opportunities* Yoo Jin Shin, 2021-11-11 you missed bitcoin Will you even miss the Metaverse A vivid Metaverse story told by the world's first Metaverse builder How to make a Metaverse to be successful What do you do for a living in the Metaverse What to prepare in advance for the Metaverse era Everyone is doing Metaverse and Metaverse these days but did you know that the world's first Metaverse was already built in Korea in 1999 22 years ago The author Professor Shin Yujin was born in 1957 read *Snow Crash* in 1996 and *Digital* in 1998 After reading this

book I started researching virtual cities in earnest in 1998 In 1999 I founded Different Thinking Different World and built the world's first Metaverse Dada Worlds At that time Dada Worlds received tremendous attention when it was introduced in foreign media such as CNN Headline News Time Magazine Wall Street Journal and numerous domestic media With the 21st century on the brink there were many expectations that humanity would finally lead a new life in the 21st century It is reported in the media that they are doing this and that on the Metaverse now but in fact it was all already happened at Dada Worlds 22 years ago In 1999 the first cyber wedding the first cyber securities company the first cyber police station and the first cyber cemetery in Dada Worlds Cyber church cyber temple cyber hospital cyber shopping mall etc There were numerous buildings and events that were the first in the world Of course the avatars there were real bride and groom real cops real clerks real stockbrokers real monks etc were all real But unfortunately as the IT bubble burst Dada Worlds also disappeared Along with the evaluation It's such a good idea but it started too early and crashed But the author is thinking How can I get ahead if I don't start too early After Dada Worlds closed I had no choice but to quit Metaverse Construction but in hopes that someone could continue this project the author tried to write a book about all the experiences and lessons learned However the world has not paid much attention to the Metaverse for 20 years so I waited patiently because I thought writing a book would be an empty cry This book was written after waiting for 20 years Now 21 years have passed since the beginning of the 21st century Metaverse is receiving great attention from people around the world Few people object to the fact that the future human habitation will move from reality to Metaverse It's a far cry from the late 20th century when the author was almost insane when he explained his business to get an investment in Dada Worlds Metaverse is a completely digital world The transition of human life from reality to the Metaverse will bring about a huge change in the lives of mankind as a whole In the Metaverse there is no need to make anything out of matter In other words things that are created digitally without the need to make them into materials in reality have an existence value in the Metaverse In the Metaverse a life completely different from the life we used to live in the real world and make everything out of material is unfolding The tremendous change of the information revolution is finally overtaking us A lot of people say Am I going to live in the Metaverse before I die It's still in the distant future People think that the Metaverse suddenly appeared because of Corona but it is not As with all technological advances in the world there has been a lot of movement under the water over a long period of time It has become a known fact now but the concept of the Metaverse first appeared in the novel White Crash in 1991 However the HMD Head Mounted Display system which is said to be the beginning of the Metaverse was started by Sutherland in 1963 Since the concept of virtual reality first started in 1963 it is now starting to be recognized by people almost 60 years later It never came out suddenly because of COVID 19 and it has been developing steadily for over 60 years without the public knowing Now because of COVID 19 the era of the Metaverse has only been moved forward a bit It was possible because I was prepared Metaverse said We are about to start so please pay attention Not that I have already started It will take some

time for the Metaverse to settle down However once the Metaverse is established it is irreversible So before that you should join the Metaverse right now Metaverse is no longer a matter of choice it is a necessity Metaverse is not just a place to go to play or to go if you want to go and stop if you don't want to it is a place everyone must enter in order to make a living in the future The reason is detailed in the book In the Metaverse unconditional preemption is the most important thing What the hell is a Metaverse How to make a Metaverse In the future everyone has to live in the Metaverse so what and how can they eat and live there What do we need to prepare in advance This book is written in the hope that you will find answers to these questions before anyone else in this book and that you will succeed by preoccupying the Metaverse in whatever you do It's about the Metaverse a completely digital world so it's published as an e-book It will be delivered to you at the speed of light the moment you purchase Preemption of anything is very important in Metaverse so we publish it electronically to save delivery time and read it as soon as possible and prepare the Metaverse before others It was written as a must-read book for those preparing for the Metaverse world and is filled with stories that only those who have experienced and managed it can tell And in the true digital world Metaverse I wrote detailed stories about what to eat to survive A platform operator who will run the platform itself called Metaverse an operator who will start various new businesses within the Metaverse and while living as a citizen in the Metaverse get a job at various companies on the Metaverse open a personal store or work as a freelancer citizens to live This book is a must-have for these three categories of people The events that happen in the real city will happen in a different way from the real city and how and what will happen is a book that records such things in a cool and pure way based on experience in the text Preface I was born in the world in 1957 It is now 2021 I was born in an industrialized society and now I live in an information society Until I was 15 I lived only studying for the middle school entrance exam and only after I passed high school in 1973 at the age of 16 I started living freely from the entrance exam hell What is life I fell in love with and wandered in search of the truth and the way even in an industrialized society When I was studying in Germany in 1987 I bought a computer called Amiga At that time I became a member of the information society by having a personal computer However because the first computer I bought was an Amiga and not an IBM computer I became blind so I was still a human being in an industrialized society Chapter 1 Dadaworlds After reading It's Digital in 1998 I clearly recognized that the information revolution is a really real concept and that it is a revolution with a far greater destructive force than the industrial revolution So I thought Shouldn't my work be changed to something that fits the information society Because I became a human in the information society I thought that what I was doing should also be suitable for the information society Chapter 2 Metaverse In order for us to live in the Metaverse in the future of course the Metaverse must be built first Many companies and people have built or intend to build the Metaverse but we need to look at how the Metaverse which will be the new base of human life should be built There are a lot of games these days that you and I say are Metaverses but Metaverses are not games at all because they are Metaverses from Snow Crash It is not a game especially for

children it is a virtual city that can replace a real city Even in this book the Metaverse is defined as a virtual city that can replace the real city

Chapter 3 Life in the Metaverse Up to now mankind has been living in the real world taking it for granted He has lived in the constraints of time and space without realizing how inconvenient it is to have to do everything in reality unaware that such a life is a life of slavery to work and work But now if we live in the Metaverse humanity will finally be freed from time space and work Of course not all aspects of human life can be solved in the Metaverse You can create a more relaxed and human world by doing things that you can be satisfied with in real life such as human gatherings with family and friends sports travel and hobbies and solving tasks that you don t have to do in reality in the Metaverse Some may object to how human life can be made through computers but if you shorten the time required for work in Metaverse and invest the remaining time for yourself and your human life you can make a better world

Chapter 4 Architect I m an Architect and I don t know much about Architecture so I organize the changes that will come to the Architect Architect becomes a very happy profession free from all restrictions in the Metaverse It was explained earlier that the 4th generation Architecture has now started but the 5th generation construction is also starting in the Metaverse The fourth generation Architecture is also a huge blue ocean but the fifth generation Architecture is even more blue ocean

Chapter 5 Artist Similar to Architects Artists are a profession that will enjoy tremendous freedom and boom in the Metaverse Unlike other professions Artists are a completely new profession in the Metaverse so let s take a closer look before the general public Of course in the Metaverse art is also completely digital Even before the Metaverse digital art appeared and there were many changes But before the advent of the Metaverse it was all half digital art It s digital art but it s all because it had to be made and enjoyed in real life

Chapter 6 Avatar There is something that everyone should do first when they first enter the Metaverse You choose or create an avatar to enter the Metaverse on your behalf Without an avatar you cannot enter the Metaverse The biggest difference between the Metaverse and the previous internet world is that there are humans in the Metaverse People enter the Metaverse as avatars that represent themselves and communicate with each other In other words the Metaverse is an internet world where humans exist So avatar related jobs will be the first promising new jobs Because avatars are beings that reveal their identity avatars must be provided in a wide variety to satisfy everyone s needs

Chapter 7 Job as Avatar Now that you understand the importance of avatars let s first take a look at what you can do by just entering the Metaverse as an avatar These are the same things that you can do only with your body in a real city without the need for special skills See what you can do as an ordinary citizen It s just things you do as avatars things you do barefoot in real life but in the Metaverse you can make a higher income while doing it more comfortably dog ghost What is a dog ghost There will be many completely new jobs in the Metaverse and among them there is a dog ghost as a job that we could not have imagined at all

Chapter 8 Designer and Creator The biggest difference between the Metaverse and the real world is that in reality everything is made of material and all materials already exist Instead anyone can create matter in the Metaverse Even

without the cost of materials Everything made of material has a price but digital production costs nothing but materials A company that operates a Metaverse starts by preparing the basic materials or things necessary for their Metaverse but they start with only the basics Anything that does not already exist can be made by citizens and can be made and sold without material cost How good is the world Chapter 9 Promising Business in Metaverse weather sales business We do not sell real world weather information but rather the Metaverse weather It is a business that sells the desired weather in the desired area It makes and sells various weather such as sunny weather rainy weather foggy weather stormy weather etc When running Dada Worlds an employee made it snow on the main square one day Waiting number ticket business It is easy to see around but among the projects that are likely to succeed in Metaverse there is a waiting number ticket business In the Metaverse as in reality if people gather anywhere there will be a lot of queues You might think that there is a waiting line in cyberspace but there is nothing you can do when dealing with people Chapter 10 Matrix Don't be surprised by the Metaverse The Matrix is coming Some of you who have read this far are still thinking Will the Metaverse be done before I die The world that people who think like that will not come to before they die will be the Matrix world not the Metaverse Appendix For those of you who might be disappointed by saying Hey I read the whole book there is no way to make money with bitcoin as if I had made money with bitcoin Whatever it is
