**Wireless Algorithms, Systems, and Applications** Kuai Xu,Haojin Zhu,2015-07-31 This book constitutes the proceedings of the 10th International Conference on Wireless Algorithms Systems and Applications WASA 2015 held in Qufu Shandong China in August 2015 The 36 revised full papers presented together with 5 revised short papers and 42 invited papers were carefully reviewed and selected from 133 initial submissions The papers present current trends challenges and state of the art solutions related to various issues in wireless networks Topics of interests include effective and efficient state of the art algorithm design and analysis reliable and secure system development and implementations experimental study and testbed validation and new application exploration in wireless networks Semantics in Mobile Sensing Zhixian Yan,Dipanjana Chakraborty,2022-06-01 The dramatic progress of smartphone technologies has ushered in a new era of mobile sensing where traditional wearable on body sensors are being rapidly superseded by various embedded sensors in our smartphones For example a typical smartphone today has at the very least a GPS WiFi Bluetooth triaxial accelerometer and gyroscope Alongside new accessories are emerging such as proximity magnetometer barometer temperature and pressure sensors Even the default microphone can act as an acoustic sensor to track noise exposure for example These sensors act as a lens to understand the user s context along different dimensions Data can be passively collected from these sensors without interrupting the user As a result this new era of mobile sensing has fueled significant interest in understanding what can be extracted from such sensor data both instantaneously as well as considering volumes

of time series from these sensors For example GPS logs can be used to determine automatically the significant places associated to a user s life e g home office shopping areas The logs may also reveal travel patterns and how a user moves from one place to another e g driving or using public transport These may be used to proactively inform the user about delays relevant promotions from shops in his regular route Similarly accelerometer logs can be used to measure a user s average walking speed compute step counts gait identification and estimate calories burnt per day The key objective is to provide better services to end users The objective of this book is to inform the reader of the methodologies and techniques for extracting meaningful information called semantics from sensors on our smartphones These techniques form the cornerstone of several application areas utilizing smartphone sensor data We discuss technical challenges and algorithmic solutions for modeling and mining knowledge from smartphone resident sensor data streams This book devotes two chapters to dive deep into a set of highly available commoditized sensors the positioning sensor GPS and motion sensor accelerometer Furthermore this book has a chapter devoted to energy efficient computation of semantics as battery life is a major concern on user experience

**From Frequency to Time-Average-Frequency** Liming Xiu,2015-04-22 Written in a simple easy to understand style this book will teach PLL users how to use new clock technology in their work in order to create innovative applications Investigates the clock frequency concept from a different perspective at an application level Teaches engineers to use this new clocking technology to create innovations in chip system level through real examples extracted from commercial products

**Lifelogging for Organizational Stress Measurement** Thomas Fischer,René Riedl,2018-09-26 In recent decades organizational stress researchers have repeatedly called for more longitudinal studies This book argues that tools and devices that have been developed for the private or organizational domains could be helpful when it comes to studying longitudinal phenomena as they offer unobtrusive measurement and are frequently employed by many individuals in daily life In particular the book examines lifelogging a research field that addresses the computer based collection of individual experiences Further it highlights areas in organizational stress research that benefit from insights in the lifelogging literature and provides a summary of tools that can be used for stress measurement It also offers an overview of the latest research and current developments on lifelogging and organizational stress for researchers interested in self measurement of stress related effects and for organizational stress researchers
