Forged in War R. David Lankes, 2021-05-15 I deal for readers seeking a more comprehensive look at information dissemination technology its context and its impact on the way in which we now live Library Journal Starred Review Many of what we think of as Information Age tools and media computers cell phones the internet encryption and more evolved directly out of modern warfare These tools started with World War I which began not with arms but with England cutting off underwater cables to Germany and isolating it accelerated through World War II and the Cold War and now play a center role in both declared and non declared conflicts like election interference and cyberbattles We buy phones and smart speakers because they are new and unlock great potential Voice assistants like Siri and Alexa help us do our work and answer that one piece of trivia that bugs us Yet these devices are data gatherers They collect repackage and monetize our questions purchases photographs web surfing to form a data industry now larger than the oil industry Well over 100 years ago the data industry put in place a business model that trades our attention for news and entertainment That model has evolved into a complex art and science of message targeting and content ownership that has splintered communities while simultaneously concentrating media ownership to a few massive corporations Forged in War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good It tells a compelling and previously story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview Author David Lankes s work has been funded by organizations such as The MacArthur Foundation The Institute for Library and Museum Services NASA The U S Department of Education The U S Department of Defense The National Science Foundation and The U S State Department This his latest book will

help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine Digital Forensic Investigation of Internet of Things (IoT) Devices Reza Montasari, Hamid Jahankhani, Richard Hill, Simon Parkinson, 2020-12-09 This book provides a valuable reference for digital forensics practitioners and cyber security experts operating in various fields of law enforcement incident response and commerce It is also aimed at researchers seeking to obtain a more profound knowledge of Digital Forensics and Cybercrime Furthermore the book is an exceptional advanced text for PhD and Master degree programmes in Digital Forensics and Cyber Security Each chapter of this book is written by an internationally renowned expert who has extensive experience in law enforcement industry and academia The increasing popularity in the use of IoT devices for criminal activities means that there is a maturing discipline and industry around IoT forensics As technology becomes cheaper and easier to deploy in an increased number of discrete everyday objects scope for the automated creation of personalised digital footprints becomes greater Devices which are presently included within the Internet of Things IoT umbrella have a massive potential to enable and shape the way that humans interact and achieve objectives These also forge a trail of data that can be used to triangulate and identify individuals and their actions As such interest and developments in autonomous vehicles unmanned drones and smart home appliances are creating unprecedented opportunities for the research communities to investigate the production and evaluation of evidence through the discipline of digital forensics
