Paolucci, Diana Maynard, Timothy Finin, Krishnaprasad Thirunarayan, 2008-10-21 The Web is a global information space consisting of linked documents and linked data As the Web continues to grow and new technologies modes of interaction and applications are being developed the task of the Semantic Web is to unlock the power of information available on the Web into a common semantic information space and to make it available for sharing and processing by automated tools as well as by people Right now the publication of large datasets on the Web the opening of data access interfaces and the encoding of

the semantics of the data extend the current human centric Web Now the Semantic Web community is tackling the challenges of how to create and manage Semantic Web content how to make Semantic Web applications robust and scalable and how to organize and integrate information from different sources for novel uses To foster the exchange of ideas and collaboration the International Semantic Web Conference brings together researchers and practitioners in relevant disciplines such as artificial intelligence databases social networks distributed computing Web engineering information systems natural language processing soft computing and human computer interaction This volume contains the main proceedings of ISWC 2008 which we are cited to offer to the growing community of researchers and practitioners of the Semantic Web We got a tremendous response to our call for research papers from a truly international community of researchers and practitioners from 41 countries submitting 261 papers Each paper received an average of 3

Software Engineering: A Hands-On Approach

Roger Y. Lee, 2013-07-04 This textbook provides a progressive approach to the teaching of software engineering First readers are introduced to the core concepts of the object oriented methodology which is used throughout the book to act as the foundation for software engineering and programming practices and partly for the software engineering process itself Then the processes involved in software engineering are explained in more detail especially methods and their applications in design implementation testing and measurement as they relate to software engineering projects At last readers are given the chance to practice these concepts by applying commonly used skills and tasks to a hands on project The impact of such a format is the potential for quicker and deeper understanding Readers will master concepts and skills at the most basic levels before continuing to expand on and apply these lessons in later chapters

Industrial Software Applications

Rainer Geisler, 2015-02-24 This book is written for engineering students and working professionals Technical professionals are increasingly involved in IT issues such as implementing IT systems managing them and taking part in requirements analysis vendor selection In this book the basics of production planning systems PPS are covered as well as their implementation in ERP Systems like SAP Readers also learn the basics of practical IT management and software creation through detailed real world examples The book serves as a full 5 ECTS study module which fits into any engineering curriculum 150 multiple choice quizzes practical exercises and a text filled with experiential examples make it a convenient choice for selfstudy and for classroom use

Management Len Asprey, Michael Middleton, 2003-01-01 Portals present unique strategic challenges in the academic environment Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution Building a portal is as much about constructing intra campus bridges as it is about user interfaces and content Designing Portals Opportunities and

Challenges discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere
