example epistemic problems with some core numbers in climate science But their theme is less the problems revealed by case studies than the methodological issues common to them all This volume shows the many ways that qualitative and quantitative approaches can productively interact how the limits of the numerical can be overcome through equitable partnerships with historical institutional and philosophical analysis

Food Security, Agricultural Policies and Economic Growth Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today's unstable global political situation

Inclusive Texts in Elementary Classrooms Amy J. Heineke, Aimee Papola-Ellis, 2022 Learn how to put children's diverse and storied experiences at the center of the curriculum Schools are more diverse than ever before but the texts and materials that typify classroom curricula continue to prioritize so-called mainstream stories and perspectives These canonical texts often exclude the nuanced identities and rich lived experiences of the very children sitting in today's classrooms But kids thrive when they see themselves in texts and learn about the world around them by connecting with the experiences of others Based on the authors' work with elementary school teachers over the last decade this resource offers strategies for moving away from canonical texts The authors present a four-part framework for selecting using and engaging students with texts that promote children's identity development literacy engagement and comprehension and learning across the content areas The practical text provides guidance for setting learning goals that align with relevant standards and curricular directives as well as classrooms examples teaching strategies and reflective questions Book Features An actionable way for teachers to move from theory to practice using what we know about culturally relevant practice and critical literacy to create instruction that enhances children's classroom experiences and learning An inclusive and intersectional approach that supports all teachers in enhancing their classroom libraries and curricular resources for the benefit of all students Specific ideas for texts and authors as well as more generalizable themes

and ideas that will guide future exploration and use of texts in classrooms Tangible strategies and rich classrooms examples from 20 expert teachers spanning diverse elementary school settings Reflective questions to help practitioners personalize the content to their own contexts

Routledge International Handbook of Green Criminology Nigel South, Avi Brisman, 2020-04-14 The Routledge International Handbook of Green Criminology was the first comprehensive and international anthology dedicated to green criminology It presented green criminology to an international audience described the state of the field offered a description of a range of environmental issues of regional and global importance and argued for continued criminological attention to environmental crimes and harms setting an agenda for further study In the six years since its publication the field has continued to grow and thrive This revised and expanded second edition of the Handbook reflects new methodological orientations new locations of study such as Asia Canada and South America and new responses to environmental harms While a number of the original chapters have been revised the second edition offers a range of fresh chapters covering new and emerging areas of study such as conservation criminology eco feminism environmental victimology fracking migration and eco rights and e waste This handbook continues to define and capture the field of green criminology and is essential reading for students and researchers engaged in green crime and environmental harm

Provisional Cities Renata Tyszczyk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed

as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities
