Engaging hands-on lessons will help your child develop a strong understanding of math step by step: adding, subtracting, multiplying, and dividing decimals; adding and subtracting fractions with different denominators; multiplying and dividing fractions; and mixed numbers. Multi-step fraction and decimal word problems, solving measurement problems with fractions and decimals, line graphs, and the coordinate plane, geometry, and volume mean and median. Your child will develop strong math skills and a positive attitude toward math with fun games and real-world applications. All you'll need are this Instructor Guide, the two Student Workbooks Part A and Part B, and a few simple manipulatives like base ten blocks and fraction tiles to make math come alive for your child. Hands-on incremental lessons that steadily build conceptual understanding. Daily review to ensure children retain what they've learned and master essential skills. Step-by-step examples help your child develop math study skills and greater independence. Games and real-world applications make math fun and relevant. Clear directions and explanatory notes make teaching straightforward for the parent. Optional extension activities and enrichment. Book recommendation link math lessons with everyday life.

WHAT PARENTS ARE SAYING Math with Confidence has made math the favorite subject in our homeschool. My kids love it and are learning the why behind every new skill they learn. As a self-proclaimed math-phobic person, I feel completely supported by the teacher's guide to present the material and help my children.

Stephanie E. The Instructor Guide is well thought out, extremely easy to follow, and doesn't require the instructor to be good at math; it enables you to learn alongside your student.
